

Annual Subject Index

Abnormalities, congenital	131	anticarcinogenic	416
Absorbance, Soret maxima	430	antifungal	27
Acetamide, [2-phenylimidazo[1,2-a]pyridin-3-yl]	203	antiperoxidative	416
Acetyl-L-carnitine	338	Antileishmanial activity	171, 173
Acid(s)		allopurinol	
N-acetyl neuraminic	180, 304	amarogentin	
4-amino-3-hydroxy-methylheptanoic	315	anemia	
arachidonic	301, 306	bacopasaponin C	
ascorbic	6, 22, 309	formycin B	
caffeic	27	imofosine	
<i>p</i> -chloromercuribenzoic	315	miltefosin	
citric	169	nephrotoxicity	
dithionitrobenzoic	186	piperine	
5-doxyzystearic	59	primaquine	
16-doxyzystearic	59	sinefungin	
ethylene diamidine tetraacetic	315, 358, 439	antioxidant	136, 418
folic	175	antiradical	416
N-glycolylneuraminic	217	arginase	401
hydroquinone- <i>O</i> , <i>O'</i> -diacetic	379	aryl acylamidase	92
hydroxycinnamic	27	catalase	447
<i>p</i> -hydroxymercuribenzenesulphonic	315	catecholase	442
iodoacetic	315	cytolytic	291
linoleic	301	epileptic	330
α -oxoglutaric	169	pro-oxidant enzymes	136
peptide nucleic	377	gelatinase	325
perchloric	341	glutathione peroxidase	447
poly (D, L-lactic-co-glycolic)	377	glutathione-s-transferase	330
poly-L-aminoacids	122	heart mitochondrial	278
polyunsaturated fatty	300	immunomodulatory	22
2-phosphoglycolic	196	laccase	41
pyruvic	169	metalloprotease	186
sialic	180, 217, 304	neurotoxic	425
thiobarbituric	300, 330	phenolase	40
2-thiobarbituric	22	radioprotective	27
thioglycolic	315	serotonin sensitive aryl acylamidase	92
trifluoroacetic	377	tyrosinase	41
Acidolysis	131, 395	Adducts	
Activation, human platelet	306	aldehyde-protein	303
Activator, proplasminogen	315	lipid-DNA	303
Activity		lipid-protein	303
acetylcholinesterase	423	Adenine	
anti-acetylcholinesterase	425	protection by caffeic acid from sulphate radical anion	27

Affiants, natural		Amine	
chitin	442	desferriox-	310
lectins	442	geminal di-	226
lignin	442	4-methoxy- β -naphthyl-	316
starch	442	β -naphthyl-	316
Affinity, isozyme	77	N,N,N',N'-tetramethylethylenedi-	316, 377
Ageing		Aminopeptidase, leucine	180
ageing	423	2-Aminopurine	147
acceleration of	330	<i>Amorphophallus</i>	
brain	330	<i>A. campanulatus</i> ('Suran')	40
biochemical and electrophysiological changes	330	characterization of tyrosinase and laccase	40
effect of aluminium	330	Amphotericin B	173
multiple unit action potentials	330	Amplification, Allele-specific	439
Na ⁺ , K ⁺ -ATPase	330	<i>Androctonus mauretanicus</i>	52
Agents		<i>Andrographis paniculata</i>	169
anticholinesterase	423	Andrographolide, 14-deoxy-11-oxo-	169
antileishmanial agent	169	antimicrobial	173
chelating	416	liver protectant	173
Aggregation, antiplatelet	416	stimulant	173
Agitotoxins	52	toxicity	172
DL-Alanine	169	Anemia	22
Albumin, bovine serum	136, 316	Angiotensin II	203
Alcoholysis, enzymatic	392	Aniline	169
Aldehydes		Animals, non-ureotelic	400
aldehydes	300	Anions, superoxide	238
shorter chain	305	Anisotropy, fluorescence	148
Aldimine, glycine-external	226	Anthocyanidins	416
Alkanes	303	Antigen	
2-Alkenals	301	histocompatibility	291
Aluminium		leukocyte function associated	291
accumulation	330	human leukocyte	291
cell vacuolization	330	Anti-inflammatory	416
demyelination	330	Antileishmanial agent	169
effects on enzyme activities	334	Antioxidant enzyme	23
effects on lipid peroxidation	334	Antioxidants	27, 300, 309, 358, 416
exposure	330	polyphenolic	358
lipofuscin levels	334	Antipain	315
mitochondria swelling	330	α_1 -Antitrypsin	316
neurodegeneration	330	Aplasia, marrow	291
neurological dysfunction	330	Arg 262	
neurotoxicity	330	Distal interactions	226
Amantadine	83	Arginase	
Amide		activation by antibodies	400
α -N-benzoyl-D,L-arginine-2-naphthyl-	315	antigenicity	406
dimethylform-	161	chromatographic behaviour	400
N7-(4-methyl) coumaryl-	315	immunological characterization	400
4-methoxy- β -naphthyl-	315	immunological cross-reactivity	406
N, N-methylene-bis-acryl-	316	inhibition by L-ornithine and L-lysine	406
β -naphthyl-	315	isoforms	400

kinetic and physical properties	400	Bromide	
microheterogeneity	400	bis (4-allyl dimethyl ammoniumphenyl) petane-3-1 di-	92
pH optimum	406	cetyl trimethyl ammonium	340
purification	401	hexadecyl trimethyl ammonium	343
substrate affinity	406	Bronchitis	131
L-Arginine	357	Brownian motion	148
Arthritis, rheumatoid	315	Brush border membrane	180
Ascorbate	5, 162, 302, 314	lipids	181
<i>Aspergillus</i>		preparation	181
<i>A. nidulans</i>	442	sugar content	181
<i>A. niger</i>	341	Buthinae	51
Assay		<i>Buthus</i>	
enzyme-linked immunosorbent	300, 325	<i>B. occitanus</i>	52
arginase	401	<i>B. eupeus</i>	52
cell adhesion	187	<i>Caenorhabditis elegans</i>	11
hydroxyl radical scavenging	23	Calcineurin	77
radical scavenging	417	Calmodulin	77
succinylated gelatin	410	calmodulin regulated enzymes and proteins	81
Atherosclerosis	301, 358, 425	Camel, Arabian	451
ATPase, liver microsomal	252	Camelus dromedaries <i>Linn.</i>	451
Atrophy, spinal muscular	439	Cancer	
Autolysis	315	cancer	301, 426
Autoxidation	301	chemoprevention	362
Azocasein	315	gastrointestinal and respiratory	131
		laryngeal	137
<i>Bacillus</i>		lung	131
<i>B. stearo thermophilus</i>	196	<i>Candida rugosa</i>	396
<i>B. subtilis</i>	197	Carbodiimide, N, N'-dicyclohexyl-	147
Beef tallow	393	Carbonyl	
Benzene, 1-chloro-2, 4-dinitro-	332	Z- benzyloxy-	315
Benzidine, diamino-	186	protein	310
Benzimidine	316	Carcinogenesis	23, 137, 416
Benzoquinone		Carcinogenic compounds	136
2,5-dibromo-3-methyl-6-isopropyl- <i>p</i> -	160	Carcinoma	
dichloro-	113	bronchial	131
Bestatin	316	human cervical	137
Bilirubin	304	renal cell	137
Biliverdin	304	Cardiotoxicity	301
Biocatalyst	396	β-Carotene	309
Biodiesel	392	Carotenoids	160, 358, 362
Bioflavonoids		Carriers, drug	
(quercetin, catechin, kaempferol, myricetin,		liposomes	169
fisetin, ellagic acid and naringenin)	416	niosomes	169
Blockers		microspheres	169
Ca ²⁺ -channel	83	preparation	170
felodipine	83	size and its efficacy	173
nicardipine	83	Catalase	23, 27, 309, 354
<i>Boehmeria nivea</i>	357	Catechin	360, 416
Brinjal	442		

Catecholase	442	urinary infections	
Cathepsin -B, -D, -H & -L	316	Coenzyme Q (ubiquinone)	
Cation exchange	31	hypotensive action	5
Cell(s)		ozonolysis	6
adhesion	291	permanganate oxidation	6
glial	203	relaxation of arterial rings	8
leydig	203	relaxation of arterial smooth muscle	5
lines	416	structural formulae	11
membrane raft	147	treatment with ferrous sulfate and ascorbic acid	6
natural killer	291	treatment with ferrous sulfate and H ₂ O ₂	7
T-	291	water-soluble derivatives	5
hepatic stellate	409	Coenzymes	175
activation and transition	409	Colitis, ulcerative	180
isolation and culture	409	Collagen	409, 453
Centruroides	51	Complex	
Cerebrosides	182	intrinsic factor-vitamin B ₁₂	139
Cetane number	392	light harvesting	160
Chelating agents	416	major histocompatibility	291
Chemiluminescence	300	Michaelis	340
Chemoprevention	421	oxygen-evolving	160
Chimpanzee	291	SDS-PPO II	352
Chlorophyll <i>a</i>	160	Compressed natural gas (CNG)	393
Chloroplasts	160	Concentration	
Chlorpyrifos	423	critical aggregation	429
Cholate, sodium	340	critical micellar	340
Cholesterol	114, 180, 203, 301	Conformational behaviour	265
phosphatidyl ethanolamine	169	Conjugates, peptide-oligonucleotide	382
Cholinergic crisis	424	Constant, Huggin's	98
Chromatography		Coproporphyrinogen	197
ADP sepharose affinity gel	62	Crystal, cross-linked enzyme	396
affinity	409	Cucumber	160
gel-filtration	31	<i>Cucumis sativus</i>	160
gel permeation	22, 429	Cyanobacteria	
heparin-sepharose	187	<i>Anabaena</i> sp.	362
high-pressure liquid	209, 300	Antarctic strains	362
ion-exchange	315, 401	carotenoid production	362
immunoaffinity	186	cyanobacteria	108
Chromogen	341	Dunaliella salina	362
α -Chymotrypsin	342	isolates	362
Cobra venom	92	mass-culture	362
Coconut water, tender	354	<i>Nostoc commune</i>	362
antioxidant effect		<i>Nostoc</i> sp.	362
anti-peroxidative effect		<i>Phormidium laminosum</i>	362
cardioprotective effect		<i>Spirulina maxima</i>	365
CCl ₄ -induced liver injury		<i>Synechococcus</i> sp.	362
Hepatoprotective activity		Cyanocobalamin	139
malnutrition		Cyclase, adenylate	77
mineral poisoning		Cycling, redox	423
treatment of kidney and urethral stones		Cyclohexene	301

Cysteine	315	replication and repair	309
Cytochrome	160	transcription	309
cytochrome C	194, 316	L-DOPA	40
cytochrome C ₅₅₂	274	Dye entrapment experiment	436
cytochrome P ₄₅₀	136, 301, 309	Dystrophy, muscular	315
Cytokines, (IFN- γ , TNF- α)	291, 409	Eclampsia	301
Cytotoxicity	291	Eczema	131
Damage, oxidative	309, 330	Electrophoresis	
Delivery modes, drug		native gelectrophoresis	404
microspheres	169	polyacrylamide gel	92, 442
liposomal	169	sodium dodecyl sulphate	31, 139, 186,
niosomal	169	polyacrylamide gel	309, 315
Densities, photon flux	109	immuno	405
Deoxyribo nucleotide triphosphate	439	Emaciation	22
L-Deprenyl	338	Emission spectra	148
Derivatives		Emissions, carcinogenic particulate	392
imino	314	Endoplasmic reticulum	300, 309
isoquinoline carboxamide	203	Energy, activation	315
polyglutamyl	175	Entropy method, maximum	147
Dermatitis	131	Enzymes	
Designation, cluster	291	acetylcholinesterase	194
Detector, flame ionization	300	antioxidant	23, 330
Diabetes mellitus	22, 131, 301, 447	calmodulin regulated	81
Diagnosis		catalase	136
DNA	439	catechol oxidase	40
pre-implantation genetic	439	cytochrome <i>b</i> reductase	136
prenatal	439	cytochrome <i>c</i> reductase	136
1,8-Diazabicyclo [5.4.0] undec-1-ene	377	cytochrome P ₄₅₀	136
Dienes, conjugated	300, 354, 358	cytoplasmic	309
Diet, high fat	260	cytosolic	300
Dihydrochloride, <i>o</i> -dianisidine	340, 341	digestive	180
Dipalmitoylphosphatidylcholine	114	effect of inhibitors	41
Disease(s)		exposure to ethylnitrosourea	136
Alzheimer's	301, 338	glucose-6-phosphatase	301
cardiovascular	416	glucose-6-phosphate dehydrogenase	136
inflammatory bowel	180	glutathione peroxidase	136
neurodegenerative	425	glutathione reductase	136
neurological degenerative	416	glutathione-S-transferase	136, 238, 330
Parkinson's	83, 301	laccase	40
periodontal	315	preparation	41
skin	22	pro-oxidant activity	136
X-linked lymphoproliferative	291	scavenging enzymes	423
Dismutase, superoxide	23, 27, 238, 309, 354, 447	superoxide dismutase	136
Disorders, premature birth	301	tyrosinase	40
Dithiothreitol	186, 315	Epileptogenicity	338
Diversity, allelic	291	Equation, Lineweaver-Burk	343
DNA		Erythrocytes, turkey	
dynamics	147	glucose 6-phosphate dehydrogenase	62

purification and properties		Fractionation, ammonium sulfate	31
Esters	301	Fuel (s)	
Ether		green	392
mono- <i>n</i> -dodecyl-	342	alternative	392
polyethylene glycol <i>p</i> -tertoctyl phenyl-	340	Functions, ureogenic and ornithinogenic	400
polyoxyethylene-10-cetyl-	342		
N-Ethylmaleimide	316	Gallate, epigallocatechin	360
Exercise, excessive	423	<i>Gallus gallus</i>	196
Extraction, aqueous enzymatic oil	393	Gammaglobulinemia	291
		Gangliosides	180
<i>Fasciola hepatica</i>	315	Gelatinases	325
Fast garnet GBC	315	Gelonin	31
Fcg receptor		Gene	
interaction with aggregated IgG	59	expression	301
rotational mobility of the cell surface proteins	59	recombination activating	291
Fenton reaction	301	survival motor neuron	439
Fibrogenesis	409	Genistein	409
Fibronectin	409, 453	Ginseng	83
Fibronectin, buffalo	188	Ginsenosides	83
Fibrosis	131, 301, 409	Glabridin	360
Flavinadenine dinucleotide	348	Global warming	392
Flavones/ isoflavones	416	Globulin	
Flavonones	416	γ -	313
Flavonoids (apigenin, genistein, morin, naringin, pelargonidin, quercetin)	358, 416	immuno-	59, 186, 291, 401
Fluid, synovial	306	α_2 -macro-	316
Fluids, biological	306	β -D-glucose	
Fluorescamine, reactivity	309	aqueous medium	340
Fluorescence		effect of pH	340
bityrosine	312	effect of pH temperature	340
chlorophyll <i>a</i>	160	glucose oxidase catalyzed oxidation	340
time-resolved	147	inhibitory effects of additives, NaNO ₃ and NaC	340
Fluoride, phenyl methyl sulfonyl	186, 310	micellar medium	340
Fluorimeters	148	water-in-oil microemulsion medium	340
Fluorophore		Glutathione	300, 309, 316, 423
intrinsic	148	Glutathione, reduced	354
extrinsic	148	<i>Glycine max</i> (Linn.)	46, 160, 197
tryptophan	148	Glycol	
Fluorophosphates		polyethylene	377
diisopropyl-	92	tetraethylene	342
<i>O</i> -benzotriazol-1-yl-N,N,N',N'-tetramethyluronium hexa-	377	Glycosaminoglycans	409
Folate metabolism		Glycosyl phosphatidylinositol	147
chain length	175	Golgi apparatus	301
effects of deuterium oxide	175	Grease, restaurant	393
folates	175		
in <i>Lactobacillus casei</i>	175	Haemoglobin	316
Food products, canned	40	<i>Halobacterium salinarium</i>	274
Forcefield, consistent valence	196	Hansch analysis	207
Formyltetrahydrofolate	175	Heparin	186
		Hepatocytes	324

Heterogeneity, micro-	400	Inhibition, ouabain	252
<i>Hevea brailiensis</i>	197	Inhibitor(s)	
Hexosamine	180	diazepam binding	203
Histidine	309	microbial peptide	315
Histones	314	oxidases	40
Homeostasis	175, 301	Injury	
Homeostasis, iron	338	ischemic reperfusion	425
<i>Homo sapiens</i>	196	ischemia-reperfusion mediated	301
Homogenization	315	membrane	46
Hsp70	246	Inositol, glycerophosphatidyl	291
Hydrazine		Insulinemia, hypo	448
<i>N</i> dinitrophenyl-	305	$\alpha 5\beta 1$ Integrin	409
2,4-dinitrophenyl-	169, 310	Interleukin-1	315
Hydrazone, 3-methyl benzothiazolinone	40	Intrinsic factor-vitamin B ₁₂ complex	
Hydrazyl, 1,1-diphenyl-2-picryl-	417	effect of gastrointestinal proteases	139
Hydrocarbon free air	300	proteolysis	139
Hydrochloride		purification	139
2,2'-azobis (amidinopropane)-	300	Invasion, tumour	315
azobis (amidinopropane)-	303	Iodide	
<i>N</i> -(1-Naphthyl)ethylenediamine di-	92	acetylthiocholine	92
2,2'-azobis (amidinopropane)-	300	3,3'-diethyloxadicarbocyanine	147
1-ethyl-3-(3'-dimethylaminopropyl) carbodiimide-	316	Iodoacetamide	315, 316
Hydrolases, glycosyl	198	Isofurans	303
Hydroperoxides	354	Isomerase, triose phosphate	195
Hydroperoxybis-cycloendoperoxides	305	Isoprostanes	300, 303
Hydroperoxybis-epidioxides	305		
Hydroxamate, phosphoglycolo	196	Jaundice	22
1-Hydroxybenzotriazole	377		
Hydroxyproline		Kaliotoxins	52
concentrations in ocular tissues	451	Ketone	
Hyperglycemia	447	α - <i>N</i> -tosyllsine chloromethyl-	316
Hyperlipidemia	260	α - <i>N</i> -tosylphenylalanine chloromethyl-	316
Hyperplasia, prostatic	137	Kinase, pyruvate	195
Hypertension	131, 203	Kinases, protein	88
Hypoinsulinemia	448	autophosphorylation	88
Hypothermia	425	Kinetics	
Hypothesis		substrate	252
"Missing self" hypothesis of tumour immunosurveillance	291	T ₃ T ₄	260
Hypothyroidism	260	Krait	92
		Kupffer cell function	22
2-Iminothiolane	31	Lacrimation	424
Immunity, innate	291	<i>Lactobacillus casei</i>	175
Immunodiffusion	139, 405	methylfolate profiles	177
Immunoglobulins	59, 186, 291, 401	<i>Lactococcus lactis</i>	197
Immunoprecipitation	291, 400	Lactoferrin, human seminal diferric	14
Immunoreactivity	31	amino acid sequence	
Incubation	310	crystal structure	
Infarction, myocardial	131	isolation and purification	
Inflammation	301		

sequence determination	15	biological	300
secretary sources	14	fluidity	59
Lactone, D-glucono- δ -	348	heterogeneity	147
Lectin	291	lipids	300
<i>Leishmania</i>		lymphocyte	59
<i>L. donovani</i>	170	plasma	300
<i>L. mexicana</i>	196	thylakoid	109, 161, 350
Leishmaniasis	169	β -Mercaptoethanol	197, 315, 316
chemotherapy	173	Mesobothus	51
<i>Leiurus quinquestriatus</i>	52	<i>Mesocristatus auratus</i>	170
Lesions, atherosclerotic	358	Metalloproteinases, matrix	
Leukemia, lymphoblastic	137	CCl ₄ intoxication	324
Leupeptin	315, 316	hepatic regeneration	324
Lincomycin	111	Metals, toxic	131
Linolenate, 12-hydroperoxy-	305	Metastasis	315
Lipase		Methionine	175
lipases	392	Methyl catecholase, purification of	442
<i>Mucor mehei</i> lipase	396	Methyltetrahydrofolate	175
<i>Candida antarctica</i> lipase	396	Micelles, reverse	343
<i>Rhizopus oryzae</i> lipase	396	Microdialysis	14
Lipid(s)		Microemulsion	
glyco	217, 301	adsorption	340
rafts	59	anisotropy	340
hydroperoxides	300	enzyme activity	340
Lipofuscin	330	liquid-liquid interface	340
Lipoprotein		kinetics	340
low-density lipoprotein	300	migration of reactants	340
susceptibility to oxidative modification	358	reaction rate	340
oxidizability	358	surfactants	340
<i>Luffa cylindrica</i>	31	Microarray	377
Luffin	31	Micronutrients	416
Lycopene	360	Microreactor	340
Lymphocytes (B- & T-)	291	Microscopy	
Lymphocyte membrane		atomic force	114
Fc γ receptor	59	epifluorescence	114
electron paramagnetic resonance studies	59	fluorescence	332
Lymphoma	291	transmission electron	429
Lyophilization	22	Microsomes	302, 309, 420
Lysis, tumour cell	291	Microviscosity	345
Lysosomes	300, 315	Mitochondria	300
Lysozyme	316	Modeling, BIOSYM molecular	195
		Molecule	
Malondialdehyde	136, 300, 332, 354, 359, 447	intercellular adhesion molecule	291
Mannitol	309	signal transducing molecule	291
Matrix		Motif	
extracellular	324, 409	immunoreceptor tyrosine based activation	291
metalloproteinase	409	immunoreceptor tyrosine based inhibitory	291
Medium, minimal essential	409	cysteine-X-cysteine-proline	291
Membrane(s)		tyrosine-X-X-methionine	
		(where X denotes any amino acid)	291

<i>Mus musculus</i>	197	palm	
Muscle weakness	425	rapeseed	
Mutagenesis, site-directed	226	safflower	
Mutagenic compounds	136	soybean	
Mutants, phototolerant	113	sunflower	
Mutation	23	tobacco	
analysis	439	vegetable	392
system, amplification refractory	440	Oligodeoxyribonucleotide	377
Mutations, site-specific	108	Oligonucleotide	377
Myofibroblast-like cells	409	applications	377
Myricetin	360	conjugates	377
		synthesis	377
Na ⁺ K ⁺ dependence	252	Orthochirus	52
NADPH	302	Orthorhombic crystal group	14
Natural Killer (NK) cells	291	<i>Oryctolagus cuniculus</i>	197
activation		Ovalbumin	316
cytotoxicity		Oxidase(s)	
function		catechol	40
inhibition		cinnamic acid	40
ligands		fatty acyl-CoA	448
receptors		glucose	340
<i>Naja naja</i>	92	L-gulonolactone	314
Narbonin	197	glycolate	195
Necrosis, liver	356	4-hexylresorcinol	40
Neostygmine	92	hydrolases	195
Neurosis	131	inhibitors	40
<i>Neurospora crassa</i>	80	isomerases	195
Neurosteroids	203	laccase	40
<i>Nicotiana tabacum</i>	197, 350	3-naphthalenediol	40
Nimesulide, antioxidant defense	238	polyphenol	40, 350, 442
<i>O</i> -Nitroacetanilide	92	tropolone	40
Nitroanilide	315	Oxidation, metal ion catalyzed	309
N-glutaryl-L-phenylalanyl- <i>p</i> -	342	<i>Panax quinquefolium</i>	83
γ-glutamyl- <i>p</i> -	180	<i>Paracoccus denitrificans</i>	274
L-leucine- <i>p</i> -	180	Parasite load	169
<i>p</i> -Nitroaniline	180	Pathway	
<i>p</i> -Nitrophenol	169	arginine catabolic	400
Nonenal, 4-hydroxy-	300	Ca ²⁺ and cAMP signaling	77
Nucleic acid precursors		cytochrome P ₄₅₀ mediated	427
purines and pyrimidines	175	glycolytic	195, 338
Nucleoplasm	314	pentose phosphate metabolic	62, 425
Nucleotides, free	209	tyrosine phosphorylation dependent signaling	409
Oil-extraction	392	<i>Pediococcus cerevisiae</i>	176
Oils	393	<i>Penicillium simplicissimum</i>	197
cottonseed		Pentamidine	173
edible, waste		Pepstatin	315
Jatropha oil		Peptidase(s)	
mango kernel		dipeptidyl-	315

dipeptidylamino-	319	Physostigmine (eserine)	92
Peptide design	265	Phytoestrogens flavonols	416
Peroxidase	340	Pigments, lipofuscin	307
glutathione	246, 330, 354	Plasmid DNA	24
horse radish	180, 409	Plasmids	301
Peroxidation, lipid	238, 300, 314, 330, 355, 423, 447	<i>Plasmodium</i>	
Peroxides, lipid	358	<i>P. falciparum</i>	196
Peroxisomes	300	<i>P. vivax</i>	426
Peroxydisulphate	27	Plastoquinone	160
Pesticides, organophosphate	423	Pneumoconiosis	301
Phagocytosis	22	Pollution, metal	131
<i>Phaseolus vulgaris</i>	160	Polyalanine	198
Phenylalanine, poly-dehydro	265	Polydipsia	448
<i>p</i> -Phenylenediamine	40	Polyglutamate, formyltetrahydrofolyl	175, 178
Phosphatase, alkaline	180, 342	Poly lactide	169
Phosphate		Polymorphism, restriction fragment length	439
dicetyl	169	Polyphagia	448
<i>p</i> -nitrophenyl	169, 342	Polyphenols	416
pyridoxal-5'-	226	Polysaccharide, arabinogalactan	22
Phosphodiesterase		Polyuria	448
activation by calmodulin and Ca ²⁺	80	Porphyrins	
complex regulatory properties		aggregation	429
inhibition of isozymes	83	effect of side chain length	429
isozymes	80	Precursors, prostaglandin	306
kinetic properties of PDE1 isoenzymes	81	Preeclampsia	301
diversity of calcium action in regulation	77	Pregnenolone	203
purification	80	Probe(s)	
regulation of PDE1 isozymes by protein phosphorylation	84	phospholipid	114
stimulation of PDE1	83	fluorescence	147
stimulation	80	Probucol	309
Phospholipid film		Procainamide	92
Structural alterations	114	Process, spermatogenic	246
domain morphology	114	Proliferation, cell	301
Phospholipids	180, 300	Prolylhydroxylase	453
Phosphorylase <i>b</i>	316	Proposition, Michaelis-Menten	343
Phosphorylation	78	Proteases, thiol	315
Photocell	162	Protein	
Photolysis	29	amyloid	330
Photo-oxidation	27	calmodulin regulated	81
Photostability	148	cell surface	59
Photosynthetic efficiency	108	death associated	291
Photosystem II		dynamics	147
D1 protein	108	Egg proteins	98
phototolerance	108	compressibility	
photoinhibition	108	denaturation	
chlorophyll fluorescence variable yield	110	density and viscosity	
senescence-induced alterations	160	ellipticity	
Phycobilisome	112	flexibility and viscometric studies	
Phycocyanin	362	Huggin's constant	

intrinsic viscosities		Radical	
ovalbumin		alkoxyl	300, 314
ovotransferrin		free	27, 300, 330
shape factor		hydroxyl	300, 314
stability		lipid peroxy	300
surface amino acid residues		lipid	300
unfolding		lipoxy	300
folding	147	perferryl	314
glyco-	217	Radiolysis	23
green fluorescent	147	Radioprotecting compounds	22
human erythrocyte membrane	188	Rancidity	301
matrix	315, 409	Reaction, polymerase chain	377, 439
membrane		Reactivity, fluorescamine	309
integrin and non-integrin groups	324	Receptors	
multimerization of	190	activating and inhibitory	291
nuclear membrane	309	central benzodiazepine	203
ribosome-inactivating	31	cholinergic	424
TIM proteins		killer cell immunoglobulin-like	291
$\alpha\beta$ barrel fold	194	leukocyte Ig-like	291
dipole moment	194	matrix	324
translation inhibitor	31	monocyte/macrophage Ig-like	291
UL16 binding	291	muscarinic	424
Proteinase, cathepsin L-like	315	natural cytotoxicity	291
activation		natural killer cells	291
assay		nicotinic	424
effect of inhibitors		peripheral benzodiazepine	203
effect of reductants		scavenger	358
effect of urea		T-cell antigen	291
molecular weight		Reductase	
pH optimum and stability		glutathione	354
purification and characterization		NADPH-cytochrome P ₄₅₀	309
storage stability		Relationship, quantitative structure-activity	203
substrate specificity		Renal dysfunction	131
temperature stability and optima		Residue effect, chiral amino acid	265
Proteolysis	139	Resorption, bone	315
<i>Pseudomonas</i>		Restriction	
<i>P. cepacia</i>	396, 397	digestion	439
<i>P. fluorescens</i>	397	fragment length polymorphism	439
<i>P. putida</i>	197	Resveratrol	416
Puromycin	316	Retardation, mental	131
Pyridine derivatives		Rheumatoid arthritis	416
2-phenylimidazo[1,2-a]	204	<i>Saccharomyces cerevisiae</i>	23, 196
structure	204	Scavengers	309
CBR and PBR binding affinities	205	radical	423
Pyridine 4-dimethylamino	377	Scavenging	27
Pyrimidines	304	enzyme levels	447
Pyrolysis	392	free radical	416

Scyllatoxins	52	Sulphate, <i>O</i> -amino-azotoluene diazonium	315
Seeds		Sulphonate, aminonaphthalene	340
leakage	48	Syndrome	
NMR relaxation measurements	47	adult respiratory distress	301, 425
storage conditions	47	pulmonary and gastric	131
Selenium	246	<i>Synechocystis</i> sp.	108
Senescence, leaf	160	Synthase, dihydropteroate	197
Sepsis	22	Synthetase, thromboxane	306
Sequencing, DNA	377		
Serotonin	92	Technique, isopiestic vapour pressure	122
Serum, Icteric	304	Tetraethoxypropane	303
Shock	301	Tetraisopropylpyrophosphoramidate	92
Silicosis	301	Theaflavin	360
Sodium dodecyl sulphate	98, 340, 350	<i>Thermotoga maritima</i>	196
<i>Solanum</i>		Thiobarbituric acid reactive substance	300, 332, 354, 358, 423
<i>S. melangena</i>	442	Thiourea	309
<i>S. tuberosum</i>	197	Thromboxane A ₂	306
Solvents, enzymes in organic	392	Thylakoids	160
Sorbitol	162	Thymocytes	315
Soret band	430	Time, transverse relaxation (T ₂)	46
Species	23, 300	<i>Tinospora cordifolia</i>	22
reactive oxygen species	23, 300, 309, 416, 423	Tissues, hepatocellular carcinoma	203
oxidant perferryl species	302	<i>Tityus serrulatus</i>	51
Spectrofluorimetry	300, 310	Tobacco	350
Spectrometry		Tocopherol	
gas chromatography-mass	300	α-	300, 309, 358, 416
mass	300	γ-	358
Spectrophotometer	341	α-Tocopherolquinone	420
Spectrophotometry	131, 300	Toluene, butylated hydroxy-	300
absorption	131	Toxicity	
Spectroscopy		heavy metal	131
absorption	430	<i>bioindicators</i>	
fluorescence	147, 429	<i>biological monitoring</i>	
¹ H NMR	429	<i>health risks</i>	
UV-visible	429	<i>mutagenic, carcinogenic & tetragenic effects</i>	
<i>Spinacia oleracea</i>	197	<i>occupational exposure</i>	
Steroidogenesis	203	isoproterenol-induced	278
Stress		Toxins, scorpion	51
cold stress	180, 182	Transaminase	
mental	131	serum glutamate oxaloacetate	354
oxidative	138, 246, 301, 330, 416, 423	serum glutamate pyruvate	354
Substance, thiobarbituric acid reactive	300, 332, 354, 358, 423	Transduction, aldehyde signal	301
Substrates		Transesterification	392, 395
peptidyl(-7-[4-methyl] coumarylamide)	319	Transferase	
peptidyl- <i>p</i> -nitroanilide	319	glutathione-S-	238
Succinate, 2-ethylhexylsulfo-	340	serine hydroxymethyl-	226
Succinimide, N-hydroxy-	316	Transglycosylases, tRNA-guanine	196
N-Succinimidyl 6-[3-(2-pyridyldithio) propionate]	31	Transients, O-J-I-P	160
Sulfoxide, dimethyl	196, 359	Transpeptidase, γ-glutamyl	180

Tremor	425	<i>V. faba</i>	442
Triglycerides	180	<i>V. narbonensis</i>	197
Trinitrobenzoate	147	Viologen, methyl	160
Triphenylphosphine	300	Viper	
<i>Trypanosoma</i>		Russels	92
<i>T. brucei brucei</i>	196	Saw scaled	92
<i>T. congolens</i>	315	Virus	
<i>T. cruzi</i>	196	murine cytomegalovirus	291
Trypsinogen	316	epstein barr virus	291
Tuberculosis	131	Vitamin B ₁₂	139
Tumour	175	Vitronectin	
		cell adhesive characteristics	191
Ubiquinol-10	358	iodoacetamide treatment	188
Ulcerative colitis	416	pathogenicity	
Upregulation, fibronectin-dependent	409	proteolytic activity	188, 191
Urea	98, 190	purification and characterization from goat plasma	186
3-(3,4-dichlorophenyl)-1,1- dimethyl	160	sulfhydryl contents	188
Uroporphyrinogen	197		
Uroporphyrinogen decarboxylase	197	Water	
		bulk	340
Vapour, water		free	340
Interaction with amino acids	122	heavy	175
Venom		solubilized	340
anti-snake	92	tender Coconut	278
cobra	92	Weight loss	425
<i>purification of AchE</i>	93		
<i>inhibition</i>	94	Zymography	410
<i>Vibro marinus</i>	196	<i>Zymomonas mobilis</i>	197
<i>Vicia</i>
