CONTENTS

Photoisomerization of retinoic acid and its influence on regulation of human keratinocyte growth and differentiation
Sridhar Rao Kunchala*, Takakaju Suzuki and Akira Murayama 71

Glutaraldehyde cross-linking of lectins to marker enzymes: Protection of binding site by specific sugars
P S Appukuttan*, Balu K Chacko, M Geetha, K I Annamma and Jaisy Mathai 77

Actin binds to the cytoplasmic tail of α1 subunit of integrin in hepatocytes
Bindu Menon and P R Sudhakaran* 81

Enzyme selectivity of new cyclooxygenase-2/5 lipoxygenase inhibitors using molecular modeling approach
V Kothekar*, Shakti Sahi and Jyoti Mishra 86

Conformational features of reduced and disulfide intact forms of hen egg white lysozyme in aqueous solution in presence of 3-chloro-1,2-propanediol and dioxane: Implications for protein folding intermediates
Y U Sasidhar* and C Ratna Prabha 97

Purification and characterization of poly(A)-binding protein from chickpea (Cicer arietinum) epicotyl
Venugopalan Cheriyath, A Balasubrahmanyam and Harish C Kapoor* 107

Purification and characterization of an organ specific haemorrhagic toxin from Vipera russelli russelli (Russell’s viper) venom
Labanyamoy Kole, Dibakar Chakrabarty, Kausiki Datta and Debasish Bhattacharyya* 114

Purification and characterization of dihydrofolate reductase from Lactobacillus leichmannii
K Narasimha Rao* 121

Succinate oxidase and fumarate reductase systems of filarial parasite Setaria digitata
L S Unnikrishnan and R Kaleysa Raj* 130

Calcium-mediated conversion of sucrose to starch in relation to the activities of amylases and sucrose-metabolizing enzymes in sorghum grains raised through liquid culture
Surekha Bhatia and Rangil Singh* 135

Notes
Determination of urinary urate with alkylamine glass-bound uricase
C S Pundir*, A K Bhargava and R Gupta 140
