Review

Chemical Genomics in Plant Biology
Ayan Sadhukhan, Lingaraj Sahoo and Sanjib Kumar Panda*

Papers

Theoretical studies on the pyridoxal-5’-phosphate dependent enzyme dopa decarboxylase:
Effect of Thr 246 residue on the co-factor-enzyme binding and reaction mechanism
Kuheli Chakrabarty, Sampad Narayan Gupta, Gourab Kanti Das* and Sukhendu Roy

6 Paths of ERK5 signaling pathway regulate hepatocyte proliferation in rat liver regeneration
Zhanpeng Li, Zhenchao Cheng, Gaiping Wang, Xiaoxia Hao, Lijun Zhang and Cunshuan Xu*

Protective effects of the ethanolic extract of Melia toosendan fruit against colon cancer
Xue-Lian Tang, Xin-Ying Yang, Youn-Chul Kim, Sung-Yeon Kim, Baek-Dong Kang, Du-Young Choi, Ok-jin Kim, Won-Cheol Park and Hyun Park*

Presence of bound substrate in lactate dehydrogenase from carp liver
Nupur Banerjee and Debasish Bhattacharyya*

Purification and biochemical characterization of endoglucanase from Penicillium pinophilum MS 20
Dipali Pol, R Seeta Laxman and Mala Rao*

Impact of transgenic cotton varieties on activity of enzymes in their rhizosphere
Usha Mina* and Anita Chaudhary

Linear and non-linear quantitative structure-activity relationship models on indole substitution patterns as inhibitors of HIV-1 attachment
Mahyar Nirouei*, Ghasem Ghasemi, Parviz Abdolmaleki, Abdolreza Tavakoli and Shahab Shariati
Note

Enhancement in the germination, growth and yield of Okra (Abelmoschus esculentus) using pre-sowing magnetic treatment of seeds
Afshan Naz, Yasir Jamil*, Zia ul Haq, Munawar Iqbal, Muhammad Raza Ahmad, Muhammad Irfan Ashraf and Rasheed Ahmad
