

# Indian Journal of Pure and Applied Physics

<http://www.niscair.res.in>; <http://nopr.niscair.res.in>; Impact Factor 0.854 (JCR 2012)

VOLUME 51

NUMBER 9

SEPTEMBER 2013

CODEN:IJOPAU 51(9) 597-664

ISSN:0019-5596 (Print); 0975-1041 (Online)

## CONTENTS

### Atomic and Molecular Physics

- First order molecular hyperpolarizabilities and intramolecular charge transfer from vibrational spectra of NLO material: 2,6-dichloro-4-nitroaniline 601  
A Janaki, V Balachandran\* & A Lakshmi

### Electromagnetism, Optics, Acoustics, Heat Transfer, Classical Mechanics and Fluid Dynamics

- Characterization of laser beams for cesium atomic fountain experiment 615  
S B Purnapatra, P Arora\*, S Yadav, A Agarwal & A Sen Gupta

- Ultrasonic and viscometry compatibility studies of nitrile-butyl rubber blends 621  
Mohd Yaser, Pratibha Singh, K N Pandey\*, Vishal Verma & Vijai Kumar

### Physics of Gases, Plasmas and Electric Discharges

- Non-linear propagation of electrostatic waves in relativistic Fermi plasma with arbitrary temperature 627  
Swarniv Chandra & Basudev Ghosh\*

### Condensed Matter: Structural, Mechanical and Thermal Properties

- Electronic properties of MoSi<sub>2</sub> 634  
Mani Shugani\*, Mahendra Aynyas, S P Sanyal & M Rajagopalan

- Effect of inversion layer and oxide layer thickness on the performance of PX-Si TFT devices 638  
D P Joshi, Kiran Sharma\* & F S Gill

- Search of an equation of state for nanomaterials 642  
Archana Bhatt, Geeta Sharma & Munish Kumar\*

### Interdisciplinary Physics and Related Areas of Science and Technology

- New grounded inductor simulator using unity gain cells 651  
Halil Alpaslan\* & Erkan Yuce

- Effect of ceramic material on heat dissipation from multi-stage depressed collector used in high efficiency traveling-wave tubes 657  
Vishant Gahlaut\*, R K Sharma, V Srivastava, P A Alvi & S K Ghosh

Authors for correspondence are indicated by (\*)

### Keyword Index

2,6-dichloro-4-nitroaniline	601	Kumar model	642
Acrylonitrile-co-butadiene rubber	621	Laser beam measurement	615
Analog filter	651	Lattice constant	634
Band structure	634	MDC collector	657
Birch-Murnaghan model	642	Microcontrollers	615
Bromo butyl rubber	621	Modulational instability	627
Bulk Modulus	634	Murnaghan model	642
Cesium fountain clock	615	Nanomaterials	642
Chlorinated polyethylene	621	QHD model	627
Compatibilization	621	Quantum plasma	627
Current follower	651	Relativistic effect	627
Density functional theory	634	SEM	621
Density of states	634	Specific heat	634
DFT	601	Tallon model	642
Drain current	638	Thermal analysis	657
Electron plasma waves	627	Thin film transistors	638
Equation of state	642	Transistors	638
FT-IR	601	Traveling-wave tube	657
FT-Raman	601	Ultrasonic velocity	621
HF	601	Unity gain cells	651
Inductor simulator	651	Vinet model	642
Instrumentation	615	Voltage follower	651
Integrated circuits	638
