

NATIONAL PRIOR ART SEARCH FACILITY

NISCAIR, 14, Satsang Vihar Marg, Near Qutub Institutional Area, New Delhi-110067

NISCAIR has instituted the National Prior Art Search Services Facility (NPASF) for the benefit of ideators, inventors, scientists of national research facilities and science planners.

Under NPASF, the following services are provided:

Prior Art Search

Under the Prior Art Search facility, one can unearth prior inventions that bear close resemblance to any patent or non-patent literature. Under this facility search is conducted on patent literature, product literature, research journals and databases.

One can ask for search and analysis report for proposed idea/query with respect to their novelty and inventiveness. This helps in filing of patent application or initiating new research proposals.

Patent Drafting

In addition to Prior Art Search, NPASF also provides help in Patent Drafting. Professionals help in the preparation of patent drafts enabling complete description of the embodiment of a process, machine, matter as per technical requirements, viz., title, cross references, background, summary, description (both brief and detailed), claims, abstract, and sequence listing.

Patent Informatics Service

Patent Informatics is the macroscopic analysis of multiple patent data. Under this service, analysis is carried out on large volumes of patent data in order to have an idea about the technology landscape. This results in unearthing of strengths and weaknesses of technologies, markets and portfolios. This helps in policy decisions, R&D strategy, technical auditing and investment decisions.

Below have been listed the charges for the various services under NPASF:

Table 1. Prior Art Search

Sl. No.	For Single Idea/concept or query	
		(Price)
1.	For any individual in India	₹ 500/-
