

Indian Journal of Biotechnology

Special Issue

on

Biology and Bioinformatics of Economically Important Plants and Microbes

<http://www.niscair.res.in/www.nopr.niscair.res.in>

VOLUME 12

NUMBER 1

January 2013

CODEN: IJBNAJ 12(1) (2013) 1-144

ISSN: 0972-5849 (print)

0975-0967 (online)

CONTENTS

Review

- Microbial inoculants to support tea industry in India 13
Anita Pandey, Shipra Singh & Lok Man S Palni

Papers

- Plant growth promoting rhizobacteria mediated improvement of health status of tea plants 20
U Chakraborty, B N Chakraborty, A P Chakraborty, K Sunar & P L Dey
- Indian medicinal plants known to contain intestinal glucosidase inhibitors also inhibit pancreatic lipase activity—An ideal situation for obesity control by herbal drugs 32
Abhishek Mukherjee & Subhabrata Sengupta
- Molecular modeling and functional characterization of a pertinent enzyme in *Streptococcus pneumoniae* serotype-2: A potential target for the development of novel pneumonia drug 40
Simrika Thapa, Md Asraful Alum, Chinmoy Saha, Abdullah Zubaer, Arzuba Akter & Shakhinur Islam Mondal
- Analyzing time course microarray data of *Toxoplasma gondii* and study the impact on host transcript levels using Bioconductor 46
Budhayash Gautam, Gurmit Singh, Atul Kumar Singh & Gulshan Wadhwa
- A bioinformatics approach towards sequence analysis for revealing dark matters 52
Radhe Shyam Thakur & Rajib Bandopadhyay
- A comparative computational study of the 'rbcL' gene in plants and in the three prokaryotic families— Archaea, cyanobacteria and proteobacteria 58
Sunil Kanti Mondal, Subhadeep Shit & Sudip Kundu
- Phylogenetic rearrangement of *Streptomyces* spp. on the basis of internal transcribed spacer (ITS) region using molecular morphometrics approach 67
Kaushik Bhattacharjee & S R Joshi
- 16S rRNA gene sequence analyses of the metagenome derived from waters of river Mahananda at Siliguri: An approach to understand bacterial diversity 80
Shriparna Mukherjee, Dhananjay Kumar, Ashis K Nanda & Ranadhir Chakraborty

Proteome analysis reveals the influence of isoelectric point and amino acid usages on the lifestyle of nitrogen fixing microorganisms Saubashya Sur, Asim K Bothra & Arnab Sen	88
<i>In silico</i> analysis of the NBS protein family in <i>Ectocarpus siliculosus</i> Niaz Mahmood & Mahdi Muhammad Moosa	98
DNA cassette for detection and IPR protection of transgenic Cyanobacteria and <i>Rhizobium</i> strains David L Biate & Arvind K Misra	103
Assessment of genetic diversity of certain Indian elite clones of <i>Cymbopogon</i> species through RAPD analysis Sinchan Adhikari, T K Bandopadhyay & P D Ghosh	109
Growth media composition and heavy metal tolerance behaviour of bacteria characterized from the sub-surface soil of uranium rich ore bearing site of Domiasiat in Meghalaya Rakshak Kumar, Macmillan Nongkhlaw, Celin Acharya & S R Joshi	115
Microbial and physico-chemical analysis of composting process of wheat straw Ieshita Pan & S K Sen	120
Short Communications	
An optimized method for extraction of RNA from tea roots for functional genomics analysis Akan Das, Dipanwita Saha & Tapan Kumar Mondal	129
Molecular approach to the classification of medicinally important actinorhizal genus <i>Myrica</i> Mhathung Yanthan & Arvind K Misra	133
Antioxidant profiling of Latkan (<i>Baccaurea ramiflora</i> Lour.) wine Arvind K Goyal, Tanmayee Mishra & Arnab Sen	137
Instructions to Contributors	141

Mondal S K	58		

NISCAIR Policy on Plagiarism

The system of formal communication in science through publication in primary journals based on originality and quality of information being the only criteria for publication. However, there have been tendencies to misuse the system and vitiate the process of science communication for personal benefits. One of the ills, afflicting science communication, is plagiarism. Attempts at plagiarism may range from verbatim copying of extensive material of other authors, misappropriating results/data of others with minor changes in language/presentation without giving credit to original source, and to publishing essentially the same information more than once.

As the premier institution of publishing primary scientific journals in various disciplines of science and technology in India, NISCAIR strongly reiterates its policy of discouraging plagiarism of all kinds. All efforts are made to detect and frustrate attempts at plagiarism through editorial screening and rigorous peer review in respect of communications received for publication in the NISCAIR publications. Cooperation of the scientific community is sought in our efforts to frustrate all attempts at plagiarism.

In case, an attempt of plagiarism is brought to our attention accompanied with convincing evidence, following steps would be taken:

- (a) After consulting the respective Editorial Board Members, authors guilty of plagiarism will be debarred from publishing their papers in NISCAIR journals.
- (b) Heads of the Departments/Institutes of the offending authors will be intimated of such incidences of plagiarism.
- (c) Such incidents of plagiarisms will be publicized through the concerned NISCAIR journals in consultation with the respective Editorial Board Members.
