ANNUAL INDEX

A Jabber Mian See Mohammed Ali 298
A K Saha
Influence of γ-irradiation on jute yarn 271
A M Sarwaruddin Chowdhury See Mohammed Ali 298
A Mukhopadhyay
Effect of air-jet texturing process variables on phisical bulk obtained by image analysis method 264
A Varada Rajulu
Chemical resistance and tensile properties of epoxy/polyethylene methacrylate blend coated bamboo fibres 42
Abrasion
Objective assessment of abrasive damage of jute-based fabric sur face by digital image analysis 264
Abrasion resistance
Influence of core-sheath ratio and core type on DREF-III friction-spun core yarns 256
Influence of fibre length and denier on properties of polyester ring and air-jet spun yarns 163
Acid dye
Colour matching on wool using natural and synthetic dyes 303
Acrylic yarn
Influence of spin finish and opening roller speed on the characteristics of OE friction-spun acrylic yarns 277
Retained strength of air-spliced yarn-Rupture process and effect of test length 277
Acryl-cotton yarn
Mechanical characteristics of jet-spun acrylic-cotton yarns 169
Retained strength of air-spliced yarn-Rupture process and effect of test length 277
Acrylsorb
A comparative study on quality of acrylsorb and cotton terrysock fabrics produced from ring, rotor and dref-3 yarns 246
Aerosol filtration
Design of an aerosol filtration apparatus based on pulse-jet cleaning 195
AFIS
Optimization of draw frame setting based on cotton single fibre length data 309
Agarwal Ritu See Gulrajani M L 138
Air permeability
Prediction of air permeability of needle-punched nonwoven fabrics using artificial neural network and empirical models 251
Air-jet nozzle
Yarn quality improvement with an air-jet attachment in cone winding 289
Air-jet spinning
Inverse relaxation in polyester-viscose MJS yarns 158
Air-jet splicing
Retained strength of air-spliced yarn-Rupture process and effect of test length 277
Air-jet spun yarn
Influence of fibre length and denier on properties of polyester ring and air-jet spun yarns 163
Air-jet textured yarn
Bulk characteristics of air-jet textured yarn woven fabrics 37
Effect of winder type and winding parameters on package density and physical bulk of air-jet textured yarns 83
Air-jet texturing
Effect of air-jet texturing process variables on physical bulk obtained by image analysis method 264
Air-spliced yarn
Retained strength of air-spliced yarn-Rupture process and effect of test length 277
Alagirusamy R See Rao R M V G K 115
Anand Nahar G See Rao R M V G K 115
Arindam Basu
Optimization of draw frame setting based on cotton single fibre length data 309
Artificial neural network
Modelling of tensile properties of needle-punched nonwovens using artificial neural networks 31
Prediction of air permeability of needle-punched nonwoven fabrics using artificial neural network and empirical models 251
Bajpai S K See Indu Shekar R 229
Bamboo fibre
Chemical resistance and tensile properties of epoxy/polyethylene methacrylate blend coated bamboo fibres 295
Bandyopadhyay A K See Neogi S K 108
Bandyopadhyay S K  
Objective assessment of abrasive damage of jute-based fabric surface by digital image analysis  
Banerjee N C See Neogi S K  
200  
Banerjee P K  
Production method and characteristics of braided PVD  
See Ray Sudhan Chandra  
Basu A  
Influence of fibre length and denier on properties of polyester ring and air-jet spun yarns  
Basu G See Roy A N  
177  
Behera B K  
Biofinishing  
Improvement in jute fabric handle through biofinishing  
Biosoft-P  
Improvement in jute fabric handle through biofinishing  
Birefringence  
Physical characteristics and structure of Indian silk fibres  
Biswa S K  
Computational and simulation studies of jute fibre length distribution  
Bleaching  
Effluent treatment in textile processing: Part I—Bleaching of cotton fabric  
Effluent treatment in textile processing: Part II—Bleaching of cotton yarn  
Book Reviews  
A text book of fibre science and technology  
Chemical technology in the pre-treatment processes of textiles  
Jute and jute blended yarn spinning  
Neps in cotton lint  
Progress in air-jet spinning  
Progress in textiles: Science & technology, Vol. 2—Textile fibres: Developments and innovations  
Yarn and technical textiles  
Borah R K See Sharma I C  
52  
Braiding  
Production method and characteristics of braided PVD  
Bulk characteristics  
Bulk characteristics of air-jet textured yarn woven fabrics  
Carbonization  
Enzymatic treatment as an alternative to carbonization of disperse/reactive dyed polyester-cotton blends  
Carpet  
Chemical modification of jute carpet pile yarns with DMDHEU to improve serviceability of jute carpet  
Cellulase  
Enzymatic treatment as an alternative to carbonization of disperse/reactive dyed polyester-cotton blends  
Improvement in jute fabric handle through biofinishing  
Cellulose yarn  
A study on wrap-spun jute yarn with cellulotic yarn as wrapping element  
Chakraborty J N See Chavan R B  
Chand Subhash See Gujrani M L  
Char length  
Flame retardancy of Nomex/cotton ring-spin blended yarn fabrics  
Chattopadhyay D P  
Improvement in jute fabric handle through biofinishing  
See Tyagi G K  
Chavan R B  
Enhancement in indigo uptake on cotton through metal salt pretreatment  
See Chattopadhyay D P  
Chellamani K P See Basu A  
Chemical resistance  
Chemical resistance and tensile properties of epoxy/polymethyl methacrylate blend coated bamboo fibres  
China tassar  
Comfort properties of mulberry and tassar silk fabrics  
Chinta S K See Deo H T  
143  
Choudhury P K  
Improvement in seam performance of jute bags  
Chowdhury S See Mukhopadhyay A  
195  
Coir  
Production method and characteristics of braided PVD  
Comfort properties  
Comfort properties of mulberry and tassar silk fabrics  
Composites  
Mechanical properties of glass composites based on knitted preforms with inlays
ANNUAL INDEX 335

Compressional energy
Influence of fibre length and denier on properties of polyester ring and air-jet spun yarns

Computer colour matching
Colour matching on wool using natural and synthetic dyes

Computer simulation
Computational and simulation studies of jute fibre length distribution

Cone winding
Yarn quality improvement with an air-jet attachment in cone winding

Core-spun yarn
Influence of core-sheath ratio and core type on DREF-III friction-spun core yarns

Cotton
A comparative study on quality of acrylsorb and cotton terrysock fabrics produced from ring, rotor and dref-3 yarns

A study on wrap-spun jute yarn with cellulotic yarn as wrapping element

Effect of pressure between roller and knife edge on the quality of double roller ginned cottons

Effluent treatment in textile processing: Part I—Bleaching of cotton fabric

Effluent treatment in textile processing: Part II—Bleaching of cotton yarn

Enhancement in indigo uptake on cotton through metal salt pretreatment

Factors affecting the radiation grafting of diethylene-laminomethyl methacrylate onto cotton, polyester and polyamide fabrics

Flame retardancy of Nomex/cotton ring-spun blended yarn fabrics

Optimization of draw frame setting based on cotton single fibre length data

Retained strength of air-spliced yarn-Rupture process and effect of test length

Structure and determinants of fibre strength in native cotton

Cotton full voile fabric
Effect of finishing agents on low-stress mechanical properties of cotton full voile fabric

Cotton-acrylic yarn
Mechanical characteristics of jet-spun acrylic-cotton yarns

Retained strength of air-spliced yarn-Rupture process and effect of test length

Cotton-polyester blend
Enzymatic treatment as an alternative to carbonization of disperse/reactive dyed polyester-cotton blends

Cotton-polyester yarn
Retained strength of air-spliced yarn-Rupture process and effect of test length

Cover factor
Some innovations in UV protective clothing

Covered yarn
A comparative study of the wrap-spun, flyer-spun covered and conventional all-jute yarns

Crispness agent
Effect of finishing agents on low-stress mechanical properties of cotton full voile fabric

Crosslinking
Chemical modification of jute carpet pile yarns with DMDHEU to improve serviceability of jute carpet

Crosslinking agent
Effect of finishing agents on low-stress mechanical properties of cotton full voile fabric

Crystalinity
Influence of γ-irradiation on jute yarn

Cylinder machine
Some preliminary investigations into the mechanisms of 1 x 1 rib loop formation on a dial and cylinder machine

D Bhatta See A K Saha
D Chattopadhyay See K P Chellamani
Debnath S
Modelling of tensile properties of needle-punched nonwovens using artificial neural networks

Degumming
Degumming of silk with lipase and protease

Degumming of silk with a fungal protease

Denim
Dyeing of ecru denim with onion extract using natural mordant combinations

Dyeing of ecru denim with onion extract as a natural dye using potassium alum in combination with harda and tartaric acid

Enhancement in indigo uptake on cotton through metal salt pretreatment

Deo H T
Dyeing of ecru denim with onion extract using natural mordant combinations

Dyeing of ecru denim with onion extract as a natural dye using potassium alum in combination with harda and tartaric acid

Effluent treatment in textile processing: Part I—Bleaching of cotton fabric

Effluent treatment in textile processing: Part II—Bleaching of cotton yarn

Enzymatic treatment as an alternative to carbonization of disperse/reactive dyed polyester-cotton blends
Dewaxing
Degumming of silk with lipase and protease

Dhamija S
Influence of spin finish and opening roller speed on the characteristics of OE friction-spun acrylic yarns
See Tyagi G K

Dial machine
Some preliminary investigations into the mechanics of 1 x 1 rib loop formation on a dial and cylinder machine

Digital fibregraph
Optimization of draw frame setting based on cotton single fibre length data
Digital image analysis
Objective assessment of abrasive damage of jute-based fabric surface by digital image analysis

Dimethylolhydroxylethane urea
Chemical modification of jute carpet pile yarns with DMDHEU to improve serviceability of jute carpet

Disperse dye
Enzymatic treatment as an alternative to carbonization of disperse/reactive dyed polyester-cotton blends

Double roller gin
Effect of pressure between roller and knife edge on the quality of double roller ginned cottons

Draw frame setting
Optimization of draw frame setting based on cotton single fibre length data
Dref-3 yarn
A comparative study on quality of acrylsorb and cotton terrysock fabrics produced from ring, rotor and dref-3 yarns
DREF-3 yarn
Radial packing density and related properties of polyester DREF-3yarns
DREF-II yarn
Influence of spin finish and opening roller speed on the characteristics of OE friction-spun acrylic yarns
DREF-span yarn
Influence of core/sheath ratio and core type on DREF-III friction-span core yarns

Drum driven winder
Effect of winder type and winding parameters on package density and physical bulk of air-jet textured yarns

Dye
Colour matching on wool using natural and synthetic dyes

Dyeing

Color matching on wool using natural and synthetic dyes
Dyeing of ecru denim with onion extract using natural mordant combinations
Enhancement in indigo uptake on cotton through metal salt pretreatment
Enzymatic treatment as an alternative to carbonization of disperse/reactive dyed polyester-cotton blends
Factors affecting the radiation grafting of diethyl-laminomethyl methacrylate onto cotton, polyester and polyamide fabrics

Effluent treatment in textile processing: Part I—Bleaching of cotton fabric
Effluent treatment in textile processing: Part II—Bleaching of cotton yarn

Ecru denim
Dyeing of ecru denim with onion extract using natural mordant combinations
Dyeing of ecru denim with onion extract as a natural dye using potassium alum in combination with harda and tartaric acid

Effluent treatment in textile processing: Part I—Bleaching of cotton fabric
Effluent treatment in textile processing: Part II—Bleaching of cotton yarn

El-Gendy Eglat H K
Factors affecting the radiation grafting of diethyl-laminomethyl methacrylate onto cotton, polyester and polyamide fabrics

El-Halwagy A A See El-Kashouti M A
El-Kashouti M A
Sublimation transfer printing of linen and polyester/linen fabrics

El-Molla M M See El-Kashouti M A
Empirical model
Prediction of air permeability of needle-punched nonwoven fabrics using artificial neural network and empirical models

Enzymatic finishing
Enzymatic treatment as an alternative to carbonization of disperse/reactive dyed polyester-cotton blends

Epox y resin
Chemical resistance and tensile properties of epoxy/polyethylene methacrylate blend coated bamboo fibres

Fabric
Design of an aerosol filtration apparatus based on pulse-jet cleaning

ANNUAL INDEX
Finishing
Enzymatic treatment as an alternative to carbonization of disperse/reactive dyed polyester-cotton blends

Effect of finishing agents on low-stress mechanical properties of cotton full voile fabric

Flame-retardancy finish
Flame retardancy of Nomex/cotton ring-spun blended yarn fabrics

Effect of alkali treatment on the mechanical properties of flax-viscose OE rotor-spun yarns

Influence of fibre length and denier on properties of polyester ring and air-jet spun yarns

Influence of fibre length and denier on properties of polyester ring and air-jet spun yarns

Optimization of draw frame setting based on cotton single fibre length data

A comparative study of the wrap-spun, flyer-spun covered and conventional all-jute yarns

Radial packing density and related properties of polyester DREF-3-yarns

Radial packing density and related properties of polyester DREF-3-yarns

Radial packing density and related properties of polyester DREF-3-yarns

Radial packing density and related properties of polyester DREF-3-yarns

Radial packing density and related properties of polyester DREF-3-yarns

Radial packing density and related properties of polyester DREF-3-yarns

Radial packing density and related properties of polyester DREF-3-yarns

Radial packing density and related properties of polyester DREF-3-yarns

Radial packing density and related properties of polyester DREF-3-yarns

Optimization of draw frame setting based on cotton single fibre length data

Influence of fibre length and denier on properties of polyester ring and air-jet spun yarns

Influence of fibre length and denier on properties of polyester ring and air-jet spun yarns

Optimization of draw frame setting based on cotton single fibre length data

A comparative study of the wrap-spun, flyer-spun covered and conventional all-jute yarns

Friction spinning
Influence of core-sheath ratio and core type on DREF-III friction-spun core yarns

Influence of spin finish and opening roller speed on the characteristics of OE friction-spun acrylic yarns

Degumming of silk with a fungal protease

Degumming of silk with lipase and protease

Degumming of silk with a fungal protease

Physical characteristics and structure of Indian silk fibres

A comparative study of the wrap-spun, flyer-spun covered and conventional all-jute yarns

Heat setting
Bulk characteristics of air-jet textured yarn woven fabrics

Improvement in seam performance of jute bags

Improvement in seam performance of jute bags

Optimization of draw frame setting based on cotton single fibre length data

Image analysis
Improvement in jute fabric handle through bio-finishing

Image analysis method
Effect of air-jet texturing process variables on physical bulk obtained by image analysis method

Enhancement in indigo uptake on cotton through metal salt pretreatment
Indu Shekar R
Effect of oxygen plasma on woollen fabric properties

Initial modulus
Modelling of tensile properties of needle-punched nonwovens using artificial neural networks

Inlays
Mechanical properties of glass composites based on knitted preforms with inlays

Inverse relaxation
Inverse relaxation in polyester-viscose MJS yarns

Jadhav S B
Effect of pressure between roller and knife edge on the quality of double roller ginned cottons

Jayachandran K See Selvaraju K
Jet orifice angle
Yarn quality improvement with an air-jet attachment in cone winding

Jet-spun yarn
Mechanical characteristics of jet-spun acrylic-cotton yarns
Quality aspects of viscose jet-spun plied yarns

Jute
A comparative study of the wrap-spun, flyer-spun covered and conventional all-jute yarns
A study on wrap-spun jute yarn with cellulosic yarn as wrapping element
Chemical modification of jute carpet pile yarns with DMDHEU to improve serviceability of jute carpet
Improvement in jute fabric handle through biofinishing
Influence of γ-irradiation on jute yarn
Modelling of tensile properties of needle-punched nonwovens using artificial neural networks
Objective assessment of abrasive damage of jute-based fabric sur face by digital image analysis
Production method and characteristics of braided PVD

Jute bags
Improvement in seam performance of jute bags

Jute carpet
Chemical modification of jute carpet pile yarns with DMDHEU to improve serviceability of jute carpet

Jute fibre
Adapting the principle of neutral sulphite cooking for modification of textile quality of jute fibre
Computational and simulation studies of jute fibre length distribution

Jute hessian cloth
Modified tappet shedding mechanism for improved performance of jute loom: Part II - Performance analysis of the mechanism

Jute loom
Modified tappet shedding mechanism for improved performance of jute loom: Part I - Design, operation and heald movement analysis of the mechanism

Jute-polypropylene blend
Modelling of tensile properties of needle-punched nonwovens using artificial neural networks

Kumarasamy See K P Chellamani

K P Chellamani
Yarn quality improvement with an air-jet attachment in cone winding

K R Salhotra
A comparative study on quality of acrysolb and cotton terrysock fabrics produced from ring, rotor and dref-3 yarns

See R Chattopadhyay

Kaushik R C D See Kothari V K

See Tyagi G K

284

20

Kiekens P See Van de Velde K

Knitted fabric
Effect of air-jet texturing process variables on physical bulk obtained by image analysis method

Knitted preform
Mechanical properties of glass composites based on knitted preforms with inlays

Knitting
Mechanical properties of glass composites based on knitted preforms with inlays
Some preliminary investigations into the mechanics of 1 x 1 rib loop formation on a dial and cylinder machine

Korea tassar
Comfort properties of mulberry and tassar silk fabrics

Kothari V K
Bulk characteristics of air-jet textured yarn woven fabrics
Effect of winder type and winding parameters on package density and physical bulk of air-jet textured yarns

See Gupta V B

Kumar D See Dhaniya S

Laming oxygen index
Flame retardancy of Nomex/cotton ring-spun blended yarn fabrics
Linen
Sublimation transfer printing of linen and polyester-linen fabrics

Lipase
Degumming of silk with lipase and protease

Loom
Modified tappet shedding mechanism for improved performance of jute loom: Part I - Design, operation and heald movement analysis of the mechanism
Modified tappet shedding mechanism for improved performance of jute loom: Part II - Performance analysis of the mechanism

Loop length
Some preliminary investigations into the mechanics of 1 x 1 rib loop formation on a dial and cylinder machine

Low-stress mechanical properties
Effect of finishing agents on low-stress mechanical properties of cotton full voile fabric

M A Jabbar Mian See S M Badier
M Madhusoothan See S Debnath
M N Amin See S M Badier
M Nural Islam See Mohammed Ali
M T Baksh See S M Badier
Madhusoothan M See Debnath S
Masjinder A See Roy A N
Mechanical characteristics
Mechanical characteristics of jet-spun acrylic-cotton yarns

Mechanical properties
Effect of alkali treatment on the mechanical properties of flax-viscose OE rotor-spun yarns
Mechanical properties of glass composites based on knitted preforms with inlays

Metal salt pretreatment
Enhancement in indigo uptake on cotton through metal salt pretreatment

MJS yarn
Inverse relaxation in polyester-viscose MJS yarns

Modelling
Modelling of tensile properties of needle-punched nonwovens using artificial neural networks

Mohammed Ali
Adapting the principle of neutral sulphite cooking for modification of textile quality of jute fibre

Moharir A V
Structure and determinants of fibre strength in native cotton

Mordanting
Dyeing of ecru denim with onion extract using natural mordant combinations
Dyeing of ecru denim with onion extract as a natural dye using potassium alum in combination with harda and tartaric acid

Mukhopadhyay A
Design of an aerosol filtration apparatus based on pulse-jet cleaning

See Kothari V K
See Sharma I C

Mulberry
Comfort properties of mulberry and tassar silk fabrics

Multifilament yarn
A study on wrap-spun jute yarn with cellulotic yarn as wrapping element

Murata-jet spinner
Mechanical characteristics of jet-spun acrylic-cotton yarns

N Ramakrishnan See Arindam Basu

Natural dye
Colour matching on wool using natural and synthetic dyes
Dyeing of ecru denim with onion extract as a natural dye using potassium alum in combination with harda and tartaric acid

Natural mordants
Dyeing of ecru denim with onion extract using natural mordant combinations
Dyeing of ecru denim with onion extract as a natural dye using potassium alum in combination with harda and tartaric acid

Needle-punched fabric
Modelling of tensile properties of needle-punched nonwovens using artificial neural networks

Needle-punched nonwoven fabric
Prediction of air permeability of needle-punched nonwoven fabrics using artificial neural network and empirical models

Needling density
Design of an aerosol filtration apparatus based on pulse-jet cleaning

Neogi S K
Modified tappet shedding mechanism for improved performance of jute loom: Part I - Design, operation and heald movement analysis of the mechanism
Modified tappet shedding mechanism for improved performance of jute loom: Part II - Performance analysis of the mechanism
Neutral sulphite cooking
Adapting the principle of neutral sulphite cooking for modification of textile quality of jute fibre

Nomex
Flame retardancy of Nomex/cotton ring-spun blended yarn fabrics

Nonwovens
Design of an aerosol filtration apparatus based on pulse-jet cleaning
Modelling of tensile properties of needle-punched nonwovens using artificial neural networks
Prediction of air permeability of needle-punched nonwovens fabrics using artificial neural network and empirical models

Onion extract
Dyeing of ecru denim with onion extract using natural mordant combinations
Dyeing of ecru denim with onion extract as a natural dye using potassium alum in combination with harda and tartaric acid

Opening roller speed
Influence of spin finish and opening roller speed on the characteristics of OE friction-spun acrylic yarns

Oxygen plasma
Effect of oxygen plasma on woollen fabric properties

P Bajaj
Some innovations in UV protective clothing

P K Banerjee See K R Sahota
P Rath See A K Saha

Package density
Effect of winder type and winding parameters on package density and physical bulk of air-jet textured yarns

Packing density
Radial packing density and related properties of polyester DREF-3yarns

Paul Roshan See Deo H T 152.217

Physical bulk
Bulk characteristics of air-jet textured yarn woven fabrics
Effect of air-jet texturing process variables on physical bulk obtained by image analysis method
Effect of winder type and winding parameters on package density and physical bulk of air-jet textured yarns

Physical characteristics
Physical characteristics and structure of Indian silk fibres

Pick density
Bulk characteristics of air-jet textured yarn woven fabrics

Plasma
Effect of oxygen plasma on woollen fabric properties

Plied yarn
Quality aspects of viscose jet-spun plied yarns

Plying
Quality aspects of viscose jet-spun plied yarns

Polyamide
Factors affecting the radiation grafting of diethylaminoethyl methacrylate onto cotton, polyester and polyamide fabrics

Polyester
Factors affecting the radiation grafting of diethylaminoethyl methacrylate onto cotton, polyester and polyamide fabrics

Polyester fabric
Design of an aerosol filtration apparatus based on pulse-jet cleaning

Polyester fibre
Influence of fibre length and denier on properties of polyester ring and air-jet spun yarns

Polyester yarn
Radial packing density and related properties of polyester DREF-3yarns

Polyester-cotton blend
Enzymatic treatment as an alternative to carbonization of disperse/reactive dyed polyester-cotton blends

Polyester-cotton yarn
Retained strength of air-spliced yarn-Rupture process and effect of test length

Polypropylene
A comparative study of the wrap-spun, flyer-spun covered and conventional all-jute yarns

Polyurethane
Modelling of tensile properties of needle-punched nonwovens using artificial neural networks

Porosity
Some innovations in UV protective clothing
Potassium alum
Dyeing of ecru denim with onion extract as a natural dye using potassium alum in combination with harda and tartaric acid

Prefabricated vertical drains
Production method and characteristics of braided PVD

Printing
Sublimation transfer printing of linen and polyester/linen fabrics

Protease
Degumming of silk with lipase and protease
Degumming of silk with a fungal protease

Protective clothing
Some innovations in UV protective clothing

Pulse-jet cleaning
Design of an aerosol filtration apparatus based on pulse-jet cleaning

Ring yarn
A comparative study on quality of acrysorb and cotton terrysock fabrics produced from ring, rotor and dref-3 yarns

Ring-spun yarn
Flame retardancy of Nomex/cotton ring-spun blended yarn fabrics

Influence of fibre length and denier on properties of polyester ring and air-jet spun yarns

Rotor yarn
A comparative study on quality of acrysorb and cotton terrysock fabrics produced from ring, rotor and dref-3 yarns

Rotor-spun yarn
Effect of alkali treatment on the mechanical properties of flax-viscose OE rotor-spun yarns

Roy A N
A comparative study of the wrap-spun, flyer-spun covered and conventional all-jute yarns

A study on wrap-spun jute yarn with cellulosic yarn as wrapping element

S Debnath
Prediction of air permeability of needle-punched nonwoven fabrics using artificial neural network and empirical models

S Bhargava
See P Basu

S B Ghosh
See P Basu

Radial packing density
Radial packing density and related properties of polyester DREF-3yarns

Radiation grafting
Factors affecting the radiation grafting of diethylaminoethyl methacrylate on cotton, polyester and polyamide fabrics

Rajhowa R
See Gupta V B

Rao R M V G K
Mechanical properties of glass composites based on knitted preforms with inlays

Ray Sadhan Chandra
Some preliminary investigations into the mechanics of 1 x 1 rib loop formation on a dial and cylinder machine

Reactive dye
Enzymatic treatment as an alternative to carbonization of disperse/reactive dyed polyester-cotton blends

Rib loop formation
Some preliminary investigations into the mechanics of 1 x 1 rib loop formation on a dial and cylinder machine

Sampath Kumar
See Banerjee P K

Seam performance
Improvement in seam performance of jute bags

Seed coat content
Effect of pressure between roller and knife edge on the quality of double roller ginned cottons

Selvaraju K
Effect of finishing agents on low-stress mechanical properties of cotton full voile fabric

Sett S K

Textile preform
  Mechanical properties of glass composites based on knitted preforms with inlays

Textured yarn
  Bulk characteristics of air-jet textured yarn woven fabrics
  Effect of air-jet texturing process variables on physical bulk obtained by image analysis method
  Effect of winder type and winding parameters on package density and physical bulk of air-jet textured yarns

Texturing
  Objective assessment of abrasive damage of jute-based fabric surf face by digital image analysis

Torsional rigidity
  Influence of fibre length and denier on properties of polyester ring and air-jet spun yarns

Transfer printing
  Sublimation transfer printing of linen and polyester/linen fabrics

Tribology
  Tribology of textile materials

Tyagi G K
  Effect of alkali treatment on the mechanical properties of flax-viscose OE rotor-spun yarns
  Inverse relaxation in polyester-viscose MJS yarns
  Mechanical characteristics of jet-spin acrylic-cotton yarns
  Radial packing density and related properties of polyester DREF-3 yarns

See Dhamija S

Viscose rayon-flax
  Effect of alkali treatment on the mechanical properties of flax-viscose OE rotor-spun yarns

Viscose-polyester yarn
  Influence of core-sheath ratio and core type on DREF-III friction-spin core yarns
  Inverse relaxation in polyester-viscose MJS yarns

Vizia N C. See Jadhav S B

Voile
  Effect of finishing agents on low-stress mechanical properties of cotton full voile fabric

Warp breakage
  Modified tappet shedding mechanism for improved performance of jute loom: Part II - Performance analysis of the mechanism

Warp tension
  Modified tappet shedding mechanism for improved performance of jute loom: Part II - Performance analysis of the mechanism

Wet processing
  Effluent treatment in textile processing: Part I — Bleaching of cotton fabric

Wettability
  Wettability and surface analysis of glass fibres

Wicking
  Effect of oxygen plasma on woollen fabric properties

Winder
  Effect of winder type and winding parameters on package density and physical bulk of air-jet textured yarns

Winding
  Yarn quality improvement with an air-jet attachment in cone winding

Wool
  Colour matching on wool using natural and synthetic dyes
