ANNUAL INDEX

Acrylic
- Eco-friendly dyeing of synthetic fibres
- Studies on physical properties of jute-acrylic blended bulked yarns
- Acrylic fibre
- Influence of wool-synthetic fibre blends on thermal insulation
- Acrylic thickener
  - Developments in acrylic-based thickeners as substitute of emulsion thickeners for pigment printing
- Acrylic yarn
  - Influence of pressure and position of first nozzle and spinning speed on the properties of acrylic MJS yarns
- Active noise control
  - Noise pollution and its control in textile industry

Agarwal B J See Bhattacharya S D
Aich Arnab See Teli M D

Air-jet spinning
- A comparative study of MTS and equivalent MJS yarns
- Influence of fibre finish on characteristics of polyester jet-spun yarns in relation to total draft and spinning speed
- Influence of pressure and position of first nozzle and spinning speed on the properties of acrylic MJS yarns
- Influence of some process parameters on the properties of polyester jet-spun yarns

Air-jet weaving machine
- Noise pollution and its control in textile industry

Air-jet yarn
- Fibre distribution in air-jet and ring yarns

Ali Mohammed
- Physico-mechanical properties of fabrics prepared from blends of sulphonated jute fibre with natural and synthetic fibres

Antheranthes flavipes
- Lambda - cyhalothrin spray as an insectproofing agent for woollen fabrics

Antibacterial finishing
- Eco-friendly finishes for textiles

Artificial neural network
- Prediction of micro-spun yarn lea CSP using artificial neural networks

Arylamines
- Azo ban, eco-norms and testing

Azo dyes
- Azo ban, eco-norms and testing

Azo ban
- Azo ban, eco-norms and testing

Bacillus subtilis
- Use of beet sugar as wool colourant

Bae sortor
- A new concept on mean fibre length in cotton

Bajaj P
- Ecofriendly finishes for textiles
  See Jassal M

Banerjee P K
- Development of textile products for protection and enhancement of environment

Banned dyes
- Eco-friendly dyeing of synthetic fibres

Bardhan M K See Sule A D
Basu Arindam
- Objective measurement of structural parameters of rotor-spin yarns

Basu Gautam See Chaudhuri Atin

Beet sugar
- Use of beet sugar as wool colourant

Bera B K
- Opto-electronic measurement of spinning tension

Beet sugar
- Use of beet sugar as wool colourant

Bettina
- Use of beet sugar as wool colourant

Bhandari C S See Mathur J P
Bhattacharya S D
A novel technique of cotton dyeing with reactive dyes at neutral pH

Bifunctional reactive dyes
Environment-friendly dyeing processes for cotton

Bio-polishing
Enzymes in textile industry - An environment-friendly approach

Bio-preparation
Enzymes in textile industry - An environment-friendly approach

Biodegradable fibre
Biotechnology applications in textile industry

Biofabric
Biotechnology applications in textile industry

Biotechnology
Biotechnology applications in textile industry

Blanket
Development of textile products for protection and enhancement of environment

Bleaching
Developments in grey preparatory processes of cotton textile materials

Blended yarn
Studies on physical properties of jute-acrylic blended bulked yarns

Book Review
Textile testing: Fibre, yarn and fabric by A Basu (reviewed by A R Garde)

Bougainvillaea
Physico-chemical study of dyed wool: Part I - Bougainvillaea as wool colourant with mixed mordant

Breaking extension
Assessment of tensile properties of cotton yarns
Studies on tensile responses of wrap-spun jute yarn

Breccodrain
Development of textile products for protection and enhancement of environment

Bulked yarn
Studies on physical properties of jute-acrylic blended bulked yarns
Studies on physical properties of jute-acrylic blended bulked yarns

Byssinosis
Environmental and health hazards in spinning industry and their control

Cannabis indica
Modification of natural polymers: Part IV - Graft copolymerization of methyl acrylate onto Cannabis indica fibre initiated by ceric ammonium nitrate

Carcinogenicity
Non-ecofriendly textile chemicals and their probable substitutes - An overview

Carding
Application of multiple take-in system at card

Cationization
Cationization of cotton for low-salt or salt-free dyeing
Improving the dyeability of natural colorants on cotton by cationization

Ceric ammonium nitrate
Modification of natural polymers: Part IV - Graft copolymerization of methyl acrylate onto Cannabis indica fibre initiated by ceric ammonium nitrate

Chattopadhyay D P
Cationization of cotton for low-salt or salt-free dyeing

Chattopadhyay R
Core coverage in DREF-III friction-spun yarns

Chauhan G
Modification of natural polymers: Part IV - Graft copolymerization of methyl acrylate onto Cannabis indica fibre initiated by ceric ammonium nitrate

Chavan R B
Environment-friendly dyeing processes for cotton

Chellamani K P
Role of fibre properties in colour non-uniformity of dyed fabrics

Chemical processing
Chemical processing on small scale - Entrepreneur's viewpoint
Chemical processing of synthetics and blends - Impact on environment and solutions
Developments in textile machinery for ecofriendly chemical processing

Chemical texturization
Effect of chemical texturization on physical and relaxation properties of jute-polypropylene ply yarns

Chowdhury A
See Punj S K
Chowdhury A M Sarwaruddin
See Ali Mohammed

Clean technology
Eco-regulations with respective Indian scene

Coir
Development of textile products for protection and enhancement of environment

Coirsorb
Development of textile products for protection and enhancement of environment
Present status of natural dyes

Eco-label
Azo ban, eco-norms and testing
Indian textile industry - Environmental issues

Eco-labelling
Environmental management systems for the textile industry: A case study

Eco-norm
Azo ban, eco-norms and testing
Indian textile industry - Environmental issues

Eco-regulations
Eco-regulations with respective Indian scene

Eco-revolution
Ecofriendly textile production

Ecofriendly chemical processing
Chemical processing on small scale - Entrepreneur’s viewpoint
Developments in textile machinery for ecofriendly chemical processing

Ecofriendly dyeing
Ecofriendly dyeing of synthetic fibres
Environment-friendly dyeing processes for cotton

Ecofriendly finishes
Ecofriendly finishes for textiles

Ecofriendly processing
Ecofriendly processing of sulphur and vat dyes - An overview
Environment-friendly processing of protein fibres

Ecofriendly textiles
Azo ban, eco-norms and testing
Ecofriendly textile production

Ecology
Non-ecofriendly textile chemicals and their probable substitutes - An overview

Emulsion thickener
Developments in acrylic-based thickeners as substitute of emulsion thickeners for pigment printing

End-of-pipe treatment
Eco-regulations with respective Indian scene

Environment protection
Chemical processing of synthetics and blends - Impact on environment and solutions
Present status of natural dyes
Recycling of textile waste for environment protection - An overview of some practical cases in the textile industry

Environmental hazard
Environmental and health hazards in spinning industry and their control

Environmental issues
Indian textile industry - Environmental issues

Insectproofing

Lambda - cyhalothrin spray as an insectproofing agent for woollen fabrics

Iron-based dyes

Ecofriendly dyeing of synthetic fibres

Ishiaque S M See Salhotra K R

Islam M Nurul See Ali Mohammed

ISO 1400

Environmental management systems for the textile industry: A case study

Jassal M

Developments in acrylic - based thickeners as substitute of emulsion thickeners for pigment printing

Jindal R See Tyagi G K

Jindal Rakesh See Tyagi G K

Joshi Mangala

Environmental management systems for the textile industry: A case study

Jute

Development of textile products for protection and enhancement of environment

Effect of chemical texturization on physical and relaxation properties of jute-polypropylene ply yarns

Studies on physical properties of jute-acrylic blended bulked yarns

Studies on tensile responses of wrap-spin jute yarns

Studies on the properties of alkali-treated jute-modacrylic flyer-spun yarns

Jute fibre

Physico-mechanical properties of fabrics prepared from blends of sulphonated jute fibre with natural and synthetic fibres

Jute-acrylic bulked yarn

Studies on physical properties of jute-acrylic blended bulked yarns

Jute-modacrylic yarn

Studies on the properties of alkali-treated jute-modacrylic flyer-spun yarns

Jute-polypropylene yarn

Effect of chemical texturization on physical and relaxation properties of jute-polypropylene ply yarns

Kaih B S See Chauhan Ghanshyam S

Kane C D

Environmental and health hazards in spinning industry and their control

Kasturiyamishkam See Shekar R Indu

Kausik R C D See Chattopadhyay R See Tyagi G K

Kerosene emulsion

Developments in acrylic - based thickeners as substitute of emulsion thickeners for pigment printing

Khan Nasrullah See Nawaz Sheikh Muhammad

Kothari V K

Theoretical model for predicting creep behaviour of nonwoven fabrics

See Patel P C

Kumar Akshay See Salhotra K R

Kumarasamy K See Chellamani K P

Lal Harinder See Chauhan Ghanshyam S

Lambda-cyhalothrin

Lambda - cyhalothrin spray as an insectproofing agent for woollen fabrics

Laminates

Fibre-reinforced composites: Their fabrication, properties and applications

Landage Sachin M See Teiti M D

Lea CSP

Prediction of micro-spin yarn lea CSP using artificial neural networks

Low-salt dyeing

Cationization of cotton for low-salt or salt-free dyeing

Low-stress mechanical properties

Studies on polypropylene - cotton spun yarns and their fabrics

Majumdar Abhijit

Assessment of tensile properties of cotton yarns

Mathur J P

Physico-chemical study of dyed wool: Part I - Bougainvillea as wool colourant with mixed mordant

Use of beet sugar as wool colourant

Matrices

Fibre-reinforced composites: Their fabrication, properties and applications

Maturity ratio

Role of fibre properties in colour non-uniformity of dyed fabrics

Mean fibre length

A new concept on mean fibre length in cotton

Mechanical properties

Influence of spin finish and opening roller speed on the mechanical properties of polyester OE rotor yarns produced with different draw-off nozzles

Mehra Anil Kumar

Chemical processing on small scale - Entrepreneur's viewpoint

Methyl acrylate

Modification of natural polymers: Part IV - Graft copolymerization of methyl acrylate onto Cannabis indica fibre initiated by ceric ammonium nitrate

Mian A Jabber See Ali Mohammed
Micro-spun yarn
Prediction of micro-spun yarn lea CSP using artificial neural networks

Micronaire value
Role of fibre properties in colour non-uniformity of dyed fabrics

Mixed mordant
Physico-chemical study of dyed wool: Part I - Bougainvillaea as wool colourant with mixed mordant

MJS yarn
Influence of pressure and position of first nozzle and spinning speed on the properties of acrylic MJS yarns

Modacrylic
Studies on the properties of alkali-treated jute-modacrylic flyer-spun yarns

Modulus
Studies on the properties of alkali-treated jute-modacrylic flyer-spun yarns

Moisture vapour permeable coatings
Ecofriendly finishes for textiles

Mordant
Physico-chemical study of dyed wool: Part I - Bougainvillaea as wool colourant with mixed mordant

Mordants
Present status of natural dyes

Multiple take-in system
Application of multiple take-in system at card

Munshi R See Dhamija S

Murata air-jet spinner
Influence of pressure and position of first nozzle and spinning speed on the properties of acrylic MJS yarns

Murata jet spinner
Fibre distribution in air-jet and ring yarns

Murata jet-spun yarn
A comparative study of MTS and equivalent MJS yarns

Murata twin spinner
Fibre distribution in air-jet and ring yarns

Murata twin-spun yarn
A comparative study of MTS and equivalent MJS yarns

Nachane R P
A new concept on mean fibre length in cotton

Nadiger G S
Azo ban, eco-norms and testing

Natural colorant
Improving the dyeability of natural colorants on cotton by cationization

Natural dyes
Ecofriendly textile production

Present status of natural dyes

Natural fibre
Biotechnology applications in textile industry

Physico-mechanical properties of fabrics prepared from blends of sulphonated jute fibre with natural and synthetic fibres

Natural polymer
Modification of natural polymers: Part IV - Graft copolymerization of methyl acrylate onto Cannabis indica fibre initiated by ceric ammonium nitrate

Nawaz Sheikh Muhammad
Application of multiple take-in system at card

Needle-punched fabric
Effect of specimen size and strain rate on the tensile properties of heat-sealed and needle-punched nonwoven fabrics

Relationship between tensile properties of fibres and nonwoven fabrics

Nigam Susheel See Shekar R Indu

Noise pollution
Environmental and health hazards in spinning industry and their control

Non-ecofriendly textile chemicals
Non-ecofriendly textile chemicals and their probable substitutes - An overview

Nonwoven
Effect of specimen size and strain rate on the tensile properties of heat-sealed and needle-punched nonwoven fabrics

Nonwoven fabric
Relationship between tensile properties of fibres and nonwoven fabrics

Theoretical model for predicting creep behaviour of nonwoven fabrics

Nozzle pressure
Influence of pressure and position of first nozzle and spinning speed on the properties of acrylic MJS yarns

Nylon
Ecofriendly dyeing of synthetic fibres

Studies on tensile responses of wrap-spun jute yarn

Opening roller speed
Influence of some process parameters on the properties of viscose fibre rotor-spun yarns

Influence of spin finish and opening roller speed on the mechanical properties of polyester OE rotor yarns produced with different draw-off nozzles

Opto-electronic measurement
Opto-electronic measurement of spinning tension

Packing density
Fibre distribution in air-jet and ring yarns
Packing factor
Effect of chemical texturization on physical and relaxation properties of jute-polypropylene ply yarns

Packing fraction
Studies on the properties of alkali-treated jute-modacrylic flyer-spun yarns

Patel P C
Effect of specimen size and strain rate on the tensile properties of heat-sealed and needle-punched nonwoven fabrics
Relationship between tensile properties of fibres and nonwoven fabrics
See Kothari V K
Paul Roshan See Teli M D
Physico-mechanical properties
Physico-mechanical properties of fabrics prepared from blends of sulphonated jute fibre with natural and synthetic fibres

Pigment printing
Developments in acrylic-based thickeners as substitute of emulsion thickeners for pigment printing

Plasma treatment
Ecofriendly finishes for textiles

Ply yarn
Effect of chemical texturization on physical and relaxation properties of jute-polypropylene ply yarns

Pollution
Indian textile industry - Environmental issues
Noise pollution and its control in textile industry

Pollution abatement
Eco-regulations with respective Indian scene

Pollution control
Chemical processing of synthetics and blends - Impact on environment and solutions

Polyacrylamide
A novel technique of cotton dyeing with reactive dyes at neutral pH

Polyacrylic acids
Ecofriendly finishes for textiles

Polyester
Ecofriendly dyeing of synthetic fibres
Studies on tensile responses of wrap-spun jute yarn

Polyester jet-spun yarn
Influence of fibre finish on characteristics of polyester jet-spun yarns in relation to total draft and spinning speed
Influence of some process parameters on the properties of polyester jet-spun yarns

Polyester OE rotor yarn
Influence of spin finish and opening roller speed on the mechanical properties of polyester OE rotor yarns produced with different draw-off nozzles

Polyester: viscose yarn
Core coverage in DREF-III friction-spun yarns
Opto-electronic measurement of spinning tension

Polyester viscose yarn
A comparative study of MTS and equivalent MJS yarns

Polymers
Fibre-reinforced composites: Their fabrication, properties and applications

Polypropylene
Effect of chemical texturization on physical and relaxation properties of jute-polypropylene ply yarns
Studies on polypropylene - cotton spun yarns and their fabrics
Studies on tensile responses of wrap-spun jute yarn

Polypropylene fibre
Influence of wool-synthetic fibre blends on thermal insulation

Pre-seeded erosion control blanket
Development of textile products for protection and enhancement of environment

Prefabricated vertical drain
Development of textile products for protection and enhancement of environment

Printing
Developments in acrylic-based thickeners as substitute of emulsion thickeners for pigment printing
Inkjet printing - A revolutionary ecofriendly technique for textile printing

Projectile weaving machine
Noise pollution and its control in textile industry

Protein fibre
Environment-friendly processing of protein fibres

Punj S K
Fibre distribution in air-jet and ring yarns

Radial packing density
Fibre distribution in air-jet and ring yarns

Ram Lal Asrey
Eco-regulations with respective Indian scene

Rao J Venkata
Developments in grey preparatory processes of cotton textile materials

Rao K M See Veer Vijay
Rapier weaving machine
Noise pollution and its control in textile industry

Reactive dyes
A novel technique of cotton dyeing with reactive dyes at neutral pH
Cationization of cotton for low-salt or salt-free dyeing

Environment-friendly dyeing processes for cotton
Reinforcing fibre
Fibre-reinforced composites: Their fabrication, properties and applications

Relaxation property
Effect of chemical texturization on physical and relaxation properties of jute-polypropylene ply yarns

Ring yarn
Fibre distribution in air-jet and ring yarns

Ring-spun yarn
Objective measurement of structural parameters of rotor-spun yarns

Rotary screen printing
Inkjet printing - A revolutionary ecofriendly technique for textile printing

Rotor yarn
Influence of spin finish and opening roller speed on the mechanical properties of polyester OE rotor yarns produced with different draw-off nozzles

Rotor-spun yarn
Influence of some process parameters on the properties of viscose fibre rotor-spun yarns
Objective measurement of structural parameters of rotor-spun yarns

Roy A N
Studies on tensile responses of wrap-spun jute yarn

Salhotra K R
A comparative study of MTS and equivalent MJS yarns
See Chattopadhyay R
See Dhamija S
See Tyagi G K

Salt-free dyeing
Cationization of cotton for low-salt or salt-free dyeing

Sardana Ajay See Behera B K

Scouring
Developments in grey preparatory processes of cotton textile materials

Screen printing
Inkjet printing - A revolutionary ecofriendly technique for textile printing

Sengupta S
Effect of chemical texturization on physical and relaxation properties of jute-polypropylene ply yarns

Sensitizers
Non-ecofriendly textile chemicals and their probable substitutes - An overview

Shahbaz Babar See Nawaz Sheikh Muhammad

Shanmugam N
Prediction of micro-spun yarn tensile shear using artificial neural networks

Sharma Dhirendra See Tyagi G K

Shekar R Indu
Influence of wool-synthetic fibre blends on thermal insulation

Shelke Vinod See Doshi Rashesh

Shenai V A
Non-ecofriendly textile chemicals and their probable substitutes - An overview

Shin Dong-yoon See Eom Seong-il

Shukla S R
Environment-friendly processing of protein fibres

Silicones
Ecofriendly finishes for textiles

Silk
Environment-friendly processing of protein fibres

Singha A S See Chauhan Ghanshyam S

Sinha A K
Studies on physical properties of jute-acrylic blended bulked yarns

Specific flexural rigidity
Effect of chemical texturization on physical and relaxation properties of jute-polypropylene ply yarns

Spin finish
Influence of spin finish and opening roller speed on the mechanical properties of polyester OE rotor yarns produced with different draw-off nozzles

Spinning
A comparative study of MTS and equivalent MJS yarns
Environmental and health hazards in spinning industry and their control
Fibre distribution in air-jet and ring yarns
Influence of pressure and position of first nozzle and spinning speed on the properties of acrylic MJS yarns
Influence of some process parameters on the properties of polyester jet-spin yarns
Studies on the properties of alkali-treated jute-modacrylic flyer-spin yarns

Spinning speed
Influence of fibre finish on characteristics of polyester jet-spin yarns in relation to total draft and spinning speed

Spinning tension
Opto-electronic measurement of spinning tension

Spun yarn
Studies on polypropylene - cotton spun yarns and their fabrics
Studies on polypropylene - cotton spun yarns and their fabrics

Sreenivasamurthy H V See Shanmugam N

Strain rate
Effect of specimen size and strain rate on the tensile properties of heat-sealed and needle-punched nonwoven fabrics
Tensile properties

Assessment of tensile properties of cotton yarns

Synthetic pyrethroid

Lambda - cyhalothrin spray as an insectproofing agent for woollen fabrics

Synthetic fibres

Ecofriendly dyeing of synthetic fibres

Physico-mechanical properties of fabrics prepared from blends of sulphonated jute fibre with natural and synthetic fibres

Synthetic textiles

Chemical processing of synthetics and blends - Impact on environment and solutions

Synthetic thickeners

Developments in acrylic-based thickeners as substitute of emulsion thickeners for pigment printing

Tensile behaviour

Effect of chemical texturization on physical and relaxation properties of jute-polypropylene ply yarns

Effect of specimen size and strain rate on the tensile properties of heat-sealed and needle-punched non-woven fabrics

Relationship between tensile properties of fibres and non-woven fabrics

Studies on physical properties of jute-acrylic blended bulked yarns

Studies on the properties of alkali-treated jute-modacrylic flyer-spun yarns

Tensile response

Studies on tensile responses of wrap-spun jute yarn

Tensile strength

Physico-mechanical properties of fabrics prepared from blends of sulphonated jute fibre with natural and synthetic fibres

Textile auxiliaries

Non-ecofriendly textile chemicals and their probable substitutes - An overview

Textile machinery

Developments in textile machinery for ecofriendly chemical processing

Textile printing

Inkjet printing - A revolutionary ecofriendly technique for textile printing

Textile waste

Recycling of textile waste for environment protection - An overview of some practical cases in the textile industry

Texturization

Effect of chemical texturization on physical and relaxation properties of jute-polypropylene ply yarns

Theoretical creep curves

Theoretical model for predicting creep behaviour of non-woven fabrics

Thermal conductivity

Influence of wool-synthetic fibre blends on thermal insulation

Thermal insulation

Influence of wool-synthetic fibre blends on thermal insulation

Thermal resistance

Influence of wool-synthetic fibre blends on thermal insulation

Thermal stability

Modification of natural polymers: Part IV - Graft copolymerization of methyl acrylate onto Cannabis indica fibre initiated by ceric ammonium nitrate

Thickener

Developments in acrylic-based thickeners as substitute of emulsion thickeners for pigment printing

Total appearance value

Studies on polypropylene - cotton spun yarns and their fabrics

Total appearance value

Studies on tensile responses of wrap-spun jute yarn

Tensile strength

Physico-mechanical properties of fabrics prepared from blends of sulphonated jute fibre with natural and synthetic fibres

Textile auxiliaries

Non-ecofriendly textile chemicals and their probable substitutes - An overview

Textile machinery

Developments in textile machinery for ecofriendly chemical processing

Textile printing

Inkjet printing - A revolutionary ecofriendly technique for textile printing

Textile waste

Recycling of textile waste for environment protection - An overview of some practical cases in the textile industry

Texturization

Effect of chemical texturization on physical and relaxation properties of jute-polypropylene ply yarns

Theoretical creep curves

Theoretical model for predicting creep behaviour of non-woven fabrics

Thermal conductivity

Influence of wool-synthetic fibre blends on thermal insulation

Thermal insulation

Influence of wool-synthetic fibre blends on thermal insulation

Thermal resistance

Influence of wool-synthetic fibre blends on thermal insulation

Thermal stability

Modification of natural polymers: Part IV - Graft copolymerization of methyl acrylate onto Cannabis indica fibre initiated by ceric ammonium nitrate

Thickener

Developments in acrylic-based thickeners as substitute of emulsion thickeners for pigment printing

Total appearance value

Studies on polypropylene - cotton spun yarns and their fabrics

Total appearance value

Studies on tensile responses of wrap-spun jute yarn
