

Indian Journal of Pure and Applied Physics

<http://www.niscair.res.in>; <http://nopr.niscair.res.in>; Impact Factor 0.854 (JCR 2012)

VOLUME 52

NUMBER 6

JUNE 2014

CODEN:IJOPAU 52(6) 365-432

ISSN:0019-5596 (Print); 0975-1041 (Online)

CONTENTS

The Physics of Elementary Particles and Fields

- Radiative decays of ground state light vector mesons with non-relativistic and relativistic phase spaces and other decay properties 369
Antony Prakash Monteiro, K B Vijaya Kumar* & Bhaghyesh

Physics of Gases, Plasmas and Electric Discharges

- Plasmon characteristics in stage-1 graphene intercalation compounds 374
Sidharth Acharya & Raman Sharma*

Condensed Matter: Structural, Mechanical and Thermal Properties

- Synthesis of γ -Al₂O₃ nano particles by different combustion modes using ammonium carbonate 378
F Bustan Afruz & M J Tafreshi*
- Synthesis, characterization and dielectric properties of nanocrystalline nickel 386
Sourav Das*, N P Lalla & G S Okram
- Polarizability investigation by first order phase transition in the self-consistent phonon approximation for PSN system 391
Manish Uniyal* & S C Bhatt

Condensed Matter: Electronic Structure, Electrical, Magnetic and Optical Properties

- Effect of current density on electrodeposited ferrous tungsten thin films 395
N Thangaraj, K Tamilarasan* & D Sasikumar
- Dielectric properties of wet and fertilized soils at radio frequencies 399
D H Gadani*, A D Vyas & V A Rana
- Two band model for the iron based superconductors 411
Anuj Nuwal, Shubhra Kakani & S L Kakani*

Interdisciplinary Physics and Related Areas of Science and Technology

- Voltage differencing transconductance amplifier-based floating simulators with a single grounded capacitor 423
Worapong Tangsrirat* & Sumalee Unhavanich

Keyword Index

γ -Al ₂ O ₃	378	Intercalated graphene	374
Ammonium carbonate	378	Iron-based superconductors	411
Decay constants	369	Light vector meson states	369
Density of states	411	Model Hamiltonian	391
Dielectric constant	386	Moisture content	399
Dielectric function	374	Nanoparticles	378
Dielectric loss	386	Phase transition	391
Dielectric properties	399	Precision LCR meter	399
Different modes of combustion	378	Quark model	369
E1 and M1 transitions	369	Radiative decays	369
EDAX	395	Scanning electron microscope	395
Electrical conductivity	386	Soil	399
Electrodeposition	395	Specific heat	411
Energy loss function	374	TEM	386
Ferroelectrics	391	Thermal decomposition	386
Fertilizer content	399	Thin films	395
Fe-W	395	Voltage differencing transconductance amplifier	423
Floating capacitance simulator	423	XRD	386, 395
Floating inductance simulator	423		
FTIR	386		
Green's functions	411		
Hardness	395
