Guidelines for Submission of Manuscript

_Indian Journal of Traditional Knowledge_ (IJTK), the journal devoted exclusively to Traditional Knowledge, provides an excellent platform for publication of research papers related to Traditional Knowledge Systems. IJTK carries original research papers, review articles, short communications based on traditional wisdom. IJTK committed and dedicated to the preservation, documentation, and dissemination of Traditional Knowledge, attempts to bring the wisdom of the past to the present. _Indian Journal of Traditional Knowledge_ is included in the Non Patent Literature part of the PCT Minimum Documentation. IJTK also has been covered by the database of Science Citation Index–Expanded with an Impact Factor and National Academy of Agricultural Sciences (NAAS) rating.

Authors, who wish to submit a manuscript, should consult and peruse carefully recent issues of IJTK for format and style or may visit NISCAIR website (www.niscair.res.in). Author should clarify the objective of the study (why study is carried out), how objective is achieved (methodology etc. followed to achieve the objective), significant results and conclusion, and significance of study. Senior or corresponding author must include the contact details of all the authors and specifically obtain the approval of all other co-authors to submit the article to this journal. When a manuscript is submitted to the IJTK it should not have been published elsewhere. Authors should submit two copies of manuscripts typed double-spaced. The list of references should not include any reference not cited in the text. Manuscripts are acknowledged on receipt. All manuscripts submitted are subject to peer review. Authors are notified as soon as a decision has been made to accept or reject a manuscript; rejection may be outright or with the possibility of revision and resubmission for a new evaluation. The Editor’s decision in these matters is final.

For ethnobotanical/ethnomedicinal reports, authors are advised to acknowledge the Knowledge Providers for providing valuable information and share their compilation and findings with the Knowledge Providers in local language. Authors are also requested to ensure that Prior Informed Consent (PIC) was taken from the Knowledge Providers as per the CBD guidelines. If the photographs of practices and knowledge holders are used, it should be with consent of respective knowledge holder/community chief/village Panchayat. If any unique practices are observed which have not been reported hitherto, this fact should be brought to the notice of knowledge providing community and/or individuals and only after sharing with them the implications of putting the same in public domain, these should be published. Various field tools of participatory rural appraisal (PRA) were applied to collect field data. How many villages visited, informants consulted, informants village’s name, and tentative quantity of dose, dosage forms, (i.e. paste, decoction, extract, powder, etc.), frequency, duration, etc. should be mentioned in the research paper. Abstract means the main findings of the study. All figures should be in a single JPEG file or in the end of text. The article should not be more than 10-12 pages including tables and photographs except review paper.

The language of the Journal is English. Books for review and manuscripts neatly typed, double-spaced, with margins on all sides along with photographs (if any in Tiff or JPEG format) may be submitted through E-mail or at the following address:
