

NARRATIVE CLIP 2

The narrative clip 2 is a wearable camera with 8-megapixel sensor that takes photos every 30 seconds. It features a 90 degree lens along with a built-in Wi-Fi that allows users to upload images wirelessly. The addition of Bluetooth allows the users to check the photos instantly on their smartphone using the accompanying iOS/ Android app. The camera also automatically sorts photos into collection of moments for easy organization and access. It comes with 8GB of storage and battery life lasts for up to 30 hours on a single charge. There's also a GPS and new modular clip designed to allow more attachment options. (www.cnet.com)

AUTOCHARGE USES INDOOR LIGHT TO CHARGE SMARTPHONES

AutoCharge is an approach that automatically charges the phone by using light beams. Their prototype charger works in a two ways: a detection mode that uses a Microsoft kinect camera for recognition of smatphone like objects, and charging mode that uses solar charging technique through LED flashlight torch to charge a smartphone. The charger which can mount on a ceiling rotates until it detects an object (phone) and also makes sure that objects similar in shape and size to smartphones are not

charged. A photovoltaic panel on the phone generates electricity from the light and charging the phone battery. When the phone's battery is full, the LED will flash in a different manner and the system automatically stops charging. (techtub.in)

NFC ENABLED SDHC MEMORY CARD

The world's first SDHC memory card utilizes the features of NFC (Near Field Communication) technology to exchange data simply with a touch. The card is available in 8GB, 16GB and 32GB versions and have UHS speed class 1 and SD speed class 10 ratings. The technology allows seeing what's on a card without having to plug the card into a card reader or camera simply by bringing a smartphone close to a card. The NFC functionality works via a 'Memory card Preview' app in order to reveal 16 thumbnails of stored photos and how much free space is left. (www.businesswire.com)

PRIMERA TRIO

The all-in-one world's smallest and lightest primera trio prints, copies and scans in full colour and black monochrome. It can print text, graphics and photo-quality images on plain paper with up to 4800 dpi print resolution. It is about the size of a hardcover book that weighs just 2.7lbs (1.2kg). It connects to any computer, laptop or tablet that includes a USB port and can run from an optional battery pack that prints up to 100 printed pages on a single charge. The printer has two feeds, one for A4-sized paper and the other for postcards, photos and other stationary measuring 4" x 6" (10 x 15 cm). It can process multiple documents at a rate of 14 pages per minutes and fits easily into computer bags, backpacks and briefcases. (www.therecycler.com)

WHAT'S NEW

PRIMO 3 HEADSET

It is a wireless headphone that combines activity tracking and audio playback. It links to a smartphone via Bluetooth (2.1 and 4.0) and has built-in TF/micro SD card to store and for playing music independently. There is a rechargeable 190mAh battery that gives 24 hours of playback on a single charge. The wires that connect the two earpieces are made from superfine NiTi metal that allows multiple bending and twisting without deformation. There are sensors onboard to track and monitor health and daily activities. It also shares your activity stats with your friends online. It also offers excellent sound quality with noise reduction technology. (www.pozible.com)

DOLFI USES ULTRASONIC SOUNDWAVES TO CLEAN CLOTHES

Dolfi is the world's smallest and gentlest washing device that removes the need for hand-washing clothes as well as offers travellers a portable cleaning option. The device works by a small transducer inside the Dolfi's plastic shell that converts electric power to a range of high-frequency soundwaves. It is placed in a container filled with water and detergent, switch it on, it creates millions of tiny bubbles in the liquid which cleans dirt and stains out of fabric in just 30 minutes. This small powerful device is 80 times more energy efficient than conventional washing machines. (www.dailymail.co.uk)

MIYO DAC AMPLIFIER

The Miyo DAC is an external headphone amplifier that significantly improves the quality of your laptop's audio. This device offers the same level of audio quality and sonic detail found in professional recording studios. It is a digital-to-analog convertor and works with all headphones. It houses the aircraft-grade aluminium with multi-colored LED level indicators on top used to indicate audio levels. It also features a multilayer PCB sporting hundred of components and avoids the common bit reduction to help ensure that what you hear is crystal clear with higher output levels. TEXTBLADE: A POCKET- SIZED KEYBOARD

TextBlade is a compact collapsible keyboard that's just half as thick as an iPhone 6. It is the world's first multitouch keyboard that uses just eight smart keys with full 19mm finger spacing. The lithium battery is built into the space bar and lasts for a month in between charges via any USB port. It uses next gen key switch technology to allow users to type using just eight large smart keys that represent the entire alphabet. It affixes itself magnetically when unfold it from the case by using a technology 'MagLever' which is superior to a rubber spring keyboard with no drag and stretch. It connects using the low energy Bluetooth system and compatible with most iOS and Android powered devices. (www.slashgear.com)
